The Regency Auction 54

September 8 • San Diego • The Omni Hotel

Welcome friends!

Regency Auction 54 abounds with highlights including three anchor collections that we are thrilled to offer. We have 347 lots crossing the block in our live auction and an additional 143 in the online session. As with all of our Regency Auctions, you know that care was taken to curate the sale.

The first collection to cross the block is the Meridian Collection of Proof Barber Dimes. Ranking near the top of the PCGS Set Registry, every coin in this set is either a Gem or Superb Gem grade, most displaying Cameo or Deep Cameo contrast. The coins placed into this collection have been carefully selected for the strong eye appeal and high grades. While not all of the coins were the highest graded, many are among the finest certified, and each was specifically collected for its visual effect. The quality of the coins is acknowledged by the 100% CAC approval. A number of coins are from previous Legend Auctions or were from some fantastic collections, including Denali and Simpson.

Up next is the Perfection Collection of Capped Bust Half Dollars. The 33-coin PCGS Date Set Registry Set begins with 1807 and ends with 1839-O. The coins in this set, which ranks as the current #2 set on the PCGS Registry, and #3 all time, as well as being the #2 CAC Registry Set are the epitome of their title. We are honored to offer this incredible collection built over the last 40 years. The quality is remarkable, all but one coin is CAC approved; several trace back to the famed Eliasberg Collection; there are a number of coins housed in old green tag holders. There is no doubt these coins are fresh to the market. Closing out the sale is the Ed Wielawski Collection of Oregon Half Dollars. The complete series consists of 14 coins struck in nonconsecutive years beginning in 1926 and ending in 1939. All the coins were hand selected by Ed, and many are either tied for finest or second finest for the issue; some of the coins are old friends, having been offered in earlier Regency Auctions.

In addition to our three anchor collections, highlights include a fabulous run of Proof Barber Quarters, several high end Peace dollars, many vividly toned Morgan Dollars and lastly, a well rounded assortment of gold coins. No matter what your collecting tastes, there will surely be something for you.

We welcome you to participate in person, online, or on the phone. If you need any assistance or would like more information do not hesitate to reach out to us, we are here to serve you, the collector.

Best,

Jessica Berkman,
President LRCA

LRCA and its representatives reserve the right to remove any attendees who impede the preview and/or the auction. Title to all merchandise shall pass to the winning bidder after receipt of good funds by LRCA. Bidders will be held responsible for their bids, including those bids placed incorrectly. PLEASE VERIFY BIDS BEFORE SUBMITTING THEM. In order to have a bid removed or corrected, bidder must contact LRCA prior to start of the auction. Bidder waives auctioneer's responsibility and holds LRCA harmless for failure to recognize, accept, receive or execute any lost or missing bids by internet, telephone, email, floor bid, fax, mail or other means. LRCA reserves the right to postpone or cancel an auction without notice. Lots may be withdrawn at LRCA's discretion, without prior notice. Lots may carry a reserve. A reserve is a price below which the auctioneer will not sell an item, or will re-purchase the item on behalf of the consignor or for LRCA. LRCA permits bids to be placed by the auctioneer, or an employee of the auctioneer, up to the pre-determined reserve set by the consignor. Legend Rare Coin Auctions' partner, Legend Numismatics, reserves the right to bid on items, for its own account and for the accounts of its clients.

DISCLAIMER AND WARRANTIES

No warranty of merchantability or fitness for a particular purpose is made or implied on any lot. No warranty, whether expressed or implied, is made with respect to any lot except for warranty of title, and in the case of title, auctioneer is selling only that right or title to the lot that the consignor may have as of the auction sale date. All lots are sold "as is" and with all faults. Purchaser hereby assumes all risks concerning and related to the grading, quality, description, condition, authenticity, and provenance of a lot.

a. Coins and currency listed in this catalog graded by PCGS, NGC, or any other third party grading service or examined by the buyer prior to the auction sale may not be returned for any reason whatsoever by any buyer, except for claims related to authenticity.

b. For non-certified coins that have not been examined by the Buyer prior to the Auction Sale: if it is determined in a review by LRCA that there is a material error in the catalog description of a non-certified coin or the LRCA no later than seventy-two (72) hours of delivery of the lots in question, and such lots are returned and received by LRCA, in their original, sealed containers, no later than fourteen (14) calendar days after delivery, in the same condition the lot(s) were delivered to the Buyer, time being of the essence.

c. If an item or items are returned pursuant to the terms herein, they must be housed in their original, sealed and unopened container.

d. Late remittance or removal of any item from its original container, or altering a coin constitutes just cause for revocation of all return privileges.

e. Grading or condition of rare coins may have a material effect on the value of the item(s) purchased, and the opinion of others (including independent grading services) may differ with the independent grading services opinion or interpretation of LRCA. LRCA shall not be bound by any prior, or subsequent opinion, determination or certification by any independent grading service.

f. Questions regarding the minting of a coin as a "proof" or as a "business strike" relate to the method of manufacture and not to authenticity.

g. All oral and written statements made by LRCA and its employees or agents (including affiliated and related companies) are statements of opinion only, and are not warranties or representations of any kind, unless stated as a specific written warranty, and no employee or agent of LRCA has authority to vary or alter these Terms and Conditions of Auction Sale. LRCA reserves the right to vary or alter the Terms of Sale, either generally or with respect to specific persons or

circumstances, in its sole discretion. Any variation or alteration shall be effective only if in writing and signed by an officer of LRCA authorized to do so.

h. LRCA is acting as an auctioneer. Title to the lots purchased passes directly from the Consignor to the Buyer. Accordingly, LRCA is not making, and disclaims, any warranty of title.

i. Bidder acknowledges that the numismatic market is speculative, unregulated and volatile, and that coin prices may rise or fall over time. LRCA does not guarantee or represent that any customer buying for investment purposes will be able to sell for a profit in the future.

j. Bidder acknowledges and agrees that neither LRCA, nor its employees, affiliates, agents, third-party providers or consignors warrant that auctions will be unimpaired, uninterrupted or error free and accordingly shall not be liable for such events.

WAIVER AND RELEASE

Bidder, for himself, his heirs, agents, successors and assignees, generally and specifically waives and releases, and forever discharges LRCA, and its respective affiliates, parents, officers, directors, shareholders, agents, subsidiaries, employees, managers and members and each of them, and their respective successors and assignees from any and all claims, rights, demands and causes of actions and suits, of whatever kind or nature, including but not limited to claims based upon Auctioneer's negligence, whether in law or equity, tort or otherwise, whether known or unknown, suspected or unsuspected (a "Claim"), which Bidder may assert with respect to and/or arising out of, or in connection with any challenge to the title to or authenticity of any goods purchased, the sale itself, any lot bid upon or consigned, and/or the auction, except where such Claim is otherwise expressly authorized in these Terms of Sale. It is the intention of Bidder that this waiver and release shall be effective as a bar to each and every Claim that may arise hereunder or be related to the Auction Sale.

DISPUTES

If a dispute arises concerning ownership of a lot or concerning proceeds of any sale, LRCA reserves the right to commence a statutory inter-pleader proceeding at the expense of the Consignor and Buyer and any other applicable party, and in such event shall be entitled to its reasonable attorneys' fees and costs. LRCA reserves the right to cancel or postpone the Auction Sale or any session thereof for any reason whatsoever. No Bidder shall have any claim as a result thereof, including for incidental or consequential damages. Neither LRCA nor any affiliated or related company shall be responsible for incidental or consequential damages arising out of any failure of the Terms of Sale, the auction or the conduct thereof and in no event shall such liability exceed the purchase price, premium, or fees paid. Rights granted to Bidders under the within Terms and Conditions of Auction Sale are personal and apply only to the Bidder who initially purchases the lot(s) from LRCA. The rights may not be assigned or transferred to any other person or entity, whether by sale of the lot(s), operation of law or otherwise. Any attempt to assign or transfer any such rights shall be absolutely void and unenforceable. No third party may rely on any benefit or right conferred by these Terms and Conditions of Auction Sale.

Any dispute arising out of or related to these Terms of Sale, the Auction Sale or any lot, with the sole exception of actions by Legend Rare Coin Auctions to collect amounts owed to it and other damages, shall be submitted to binding arbitration pursuant to the commercial arbitration rules of the American Arbitration Association, with any arbitration hearing to occur in Monmouth County, New Jersey. Absent an agreement of the parties, the arbitrator shall limit discovery to that which is necessary to enable the hearing to proceed efficiently. The arbitrator shall not have the power to award punitive or consequential damages, nor alter, amend modify any of the terms of this Agreement. The award by the arbitrator, if any, may be entered in any court having jurisdiction thereof. Each party shall pay one-half the costs of the arbitration. Bidder acknowledges and agrees that the competent courts of the State of New Jersey shall have exclusive in personam jurisdiction, subject to the requirement to arbitrate, over any dispute(s) arising hereunder, regardless of any party's current or future residence or domicile. Bidder further agrees that venue of the arbitration proceeding shall be in Monmouth County, New Jersey; and any court proceeding shall be in the Monmouth County Superior Court, in the State of New Jersey, and in each case waive any claim of Forum Non Conveniens. Laura Sperber
Partner

Laura was raised in Highland Park, NJ. During high school, the coin bug hit her hard. Her trip to the 1976 NYC ANA left a lasting mark and huge desire for her to own and handle the greatest rarities. While attending Monmouth University, Laura attended coin shows more than classes. After college, she started LSS RCI, a wholesale coin company. In 1986, she realized the need for a "better" coin retailer and teamed up in 1986 with George Huang to form Legend Numismatics.

In 1996 Bruce Morelan became a partner and since then Legend has exclusively built or assisted in assembling this generation's greatest collections. In 2012 Laura saw the need for a smaller, boutique auction firm, and created Legend-Morphy with Dan Morphy, whom she split with in 2014. Today, Laura is also a leading consumer advocate for coins. The passion has never subsided, and she keeps a beautiful Proof Walker on her desk to this day.

Bruce Morelan
Partner

Bruce started collecting coins when he was only six years old and by the time he was in high school his dream was to be a coin dealer. But life intervened and instead, Bruce went into business. By chance, he became Legend Numismatics' financial backer in 1996. His great grandmother had given him three coins when he was young, one of which being a Trade Dollar, so he set out to build the finest Trade Dollar set. After a few years with ultra rarities, Bruce returned to his love of dollars and completed both a set of Gobrechts and a set of Seated Dollars.

After selling those sets, Bruce recently returned to dollars with a new Gobrecht set and a spectacular early dollar set capped by his dream coin, the Amon Carter 1794 Dollar. Not many collector's can say they have completed not only the finest 1794-1885 Dollar Sets and have over the years owned such coins as two 1913 Liberty Head Nickels, an 1894-S Dime, 1876-CC Twenty Cent piece, 1827 Original and Restrike Quarters, 1838-O Half Dollar, two 1885 Trade Dollars and four 1884 Trade Dollars!

1/2C 1848 ORIGINAL PCGS PR65 BN CAC

Ex Robison-Patrick as noted on the holder.

We were smitten at first sight. This coin is of amazing HIGH END quality! This is a gorgeous, GEM Brown Proof with ample original red clinging to the surfaces, evident when you rotate the reflective brown copper surfaces in a light. Even though they are toned over the mirrors are pristine and actually have clarity. The strike of this beautiful Proof rarity is very crisp, showing off a full, razor sharp definition throughout the design elements. Some traces of delicate violet/azure overtones add to the sensational, classy visual allure! WOW.

Ex. Stack's February 1982 sale of the Ellis Robison Collection, lot 381; Jon Hanson; Donald G. Partrick Collection; Heritage's sale of the Partrick Collection, April 2021, lot 3761; Regency Auction 48, Legend Rare Coin Auctions, October 2021, lot 223; Heritage, May 2022, lot 3701.

Only 15 Originals are estimated to have been struck. PCGS 3, NGC 1, CAC 4. This GEM realized \$32,900 in our October 2021 Regency Auction. The other PCGS/CAC example to sell, the Scanlon-Halpern-Hain-Gardner coin realized nearly \$40,000 over seven years ago. The current PCGS Price Guide value is listed at \$47,500. There are NONE FINER in the BN designation. This GEM is worthy of a WORLD CLASS Proof half cent cabinet! Do not let this important opportunity pass you by!

PCGS# 1296 | EST: \$28,000+

LOT 2

1C 1816 PCGS MS64 BN CAC

A lustrous mottled brown CHOICE Mint State N-6. This Rarity-2 die pair is identified by a die line in the headband above ERTY and a small die chip on the 6 notes the earlier, unlapped die state. A brilliant brown lustrous surface gleams and accents the well struck devices and lovely surfaces. Accents of original red cling to areas and a gentle dusting of iridescent violet adheres to the surfaces in places. Pleasingly well struck and attractive.

PCGS 47, NGC 29, CAC 24. The most recent example of a PCGS MS64 CAC sold in November 2021 for \$2,400 and the current Collectors Universe value is listed at \$2,600. This is a wonderful example of the first year of this type, and represents the sole denomination produced in 1816.

PCGS# 1591 | EST: \$2,000+

LOT 3

1C 1837 HEAD OF 1838 PCGS MS66+ BN CAC

A GLORIOUS N-11! This is the FINEST graded 1837 Head of 1838 large cent in all color categories. A sensationally bold luster engages the eye, glowing with a full rolling cartwheel brilliance. A warm brown undertone engages with hints of original red and a dusting of iridescent steely blue. The devices are crisply rendered from an exacting blow from the dies. The reverse die was in an advanced state, with multiple die cracks that add to the charm of this great looking 1837 large cent.

PCGS 18, NGC 18, CAC 9. This is the only MS66+ BN graded and NONE are higher at PCGS. This GEM sold in an NGC MS66 BN holder back in November 2017 for \$5,040. Unpriced in the PCGS Price Guide, we expect this AMAZING coin will bring a bid near the MS67 BN CAC CPG value of \$8,120. Do not let this SUPERB large cent pass you by!

PCGS# 1729 | EST: \$5,000+

LOT 4

1C 1840 LARGE DATE N-6 PCGS MS66 RB CAC

Ex Naftzger Collection, as noted on the insert.

A truly SPECTACULAR GEM example, this is the FINEST listed in the Noyes Census and ranks as CC# 1 in Bob Grellman's Census and clearly one of the FINEST KNOWN 1840 Large Date cents of all varieties. Just the name Naftzger invokes images of the FINEST large cents! Bold cartwheel luster radiates and swirls boldly on both sides.

Sharply struck up devices have a full, crisply defined strike on both sides. Smooth, virtually flawless fields have about 50% original red overall with some faint lilac-violet-blue toning graces the surfaces. With the aid of a strong glass, you can find a small fleck or tiny tick or two, all of which serve as pedigree markers and will forever identify this coin as the famed Naftzger coin. Ex Loye Lauder Collection, Doyle Galleries, December 1983, lot 433; Ted Naftzger Collection, Part III, Goldberg's, September 2009, lot 609; intermediaries; our consignor.

PCGS 3, NGC 0, CAC 2. The current PCGS Price Guide value is \$13,500 and when this coin last sold, it brought nearly \$11,000 over a decade ago. Worthy of the FINEST of sets, we think this coin will bring a very strong bid when the hammer falls. Good luck.

PCGS# 395835 | EST: \$12,000+

LOT 5

PCGS 1, NGC 0, CAC 1. The current Collectors Universe value is listed at \$14,500. For a type collector seeking one of the FINEST later date large cents that exists, you need to own this SUPERB GEM!

PCGS# 1865 | EST: \$10,000+

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 7**1C 1867/67 NGC MS62 BN**

FS-301, S-1. A nearly CHOICE Mint State example of this scarce and popular repunched date variety with the 67 boldly doubled. Well struck overall. There is a tiny fleck or two on the obverse, which are noted for accuracy.

PCGS 12, NGC 9. The current Collectors Universe value is \$1,750 and no NGC coin has sold in auction since May 2005. A PCGS-graded example brought \$1,440 three years ago. The 1872 mintage of 65,000 represented the final emission of this odd denomination for circulation (a small number of Proofs would be struck for collectors in 1873 and then the denomination ceased to be produced). With such a low mintage, the 1872 is a key date in all grades, and becomes incredibly RARE in GEM Mint State.

The present example is very impressive visually, defined by its reflective, Prooflike fields and sharply impressed devices. Rich, brick red coloration dominates the surfaces with soft gold, light brown, and iridescent lilac accents. The definition is crisp, with razor sharp design elements. A high end example in every sense.

**LOT 26****3CS 1856 PCGS MS65 CAC**

This is a wonderfully preserved GEM with a great, totally original look. While a "common" date with a mintage of 1,458,000, this date is quite challenging in this grade and VERY RARE any finer. A rich, thick, satiny mint frost belies a gentle, even dusting of pale blue, rose, gold, and apricot iridescent toning. Struck from a dramatically cracked reverse die, most of the details are crisp in the centers, and display just a hint of bluntness in the date, letters, and stars. The surfaces are very clean and devoid of any distracting marks, even when viewed with the aid of a strong glass.

PCGS 39, NGC 18, CAC 17. The last PCGS MS65 CAC sold two and a half years ago, realizing \$2,468 in our Regency Auction 37. Despite a sizable mintage, the 1924-D is a major condition rarity. Indeed, after 36 years of operations, PCGS has graded none finer than MS66, making this marvelous GEM tied for second highest graded. This Premium Quality GEM is a very classy piece. PCGS 5, NGC 11. There has only been one example sold in the last dozen or more years, a marvelously toned example that realized \$41,125 in our December 2019 Regency Auction. The current PCGS Price Guide value is listed at \$35,000 and we have no doubt an immaculate example like this one will bring that or more. A single MS68+ is graded higher and that coin has not sold in auction. Worthy of the FINEST of collections. Good luck.

5C 1937-D 3 LEGS NGC MS61

A lovely Mint State example of this famed Buffalo nickel variety. One of the most famous of all 20th century "errors" the 3-Legged Buffalo nickel is always in strong demand and popular among collectors. The present example has a strong eye appeal for the modest MS61 grade, and we believe that in the past, this coin would have been called CHOICE BU. A very pretty luster and soft tone adds to the visual allure.

PCGS 38, NGC 475. The most recent NGC-graded example realized \$2,280 and the current Collectors Universe value is listed at \$3,000. A coin worthy of any Buffalo nickel collection lacking a Mint State example of this scarce issue. Good luck.

LOT 49

5C 1937-D 3 LEGS PCGS MS62

A very appealing example of this KEY issue. With distinct claims to the CHOICE grade, the definition is bold with nicely struck devices. A glowing luster accents the iridescent toning accents. The eye appeal is wonderful and there are no serious marks or lines of any kind, it is kind of a head scratcher as to why CAC did not bean this one. Oh, well, it is a very nice and wholesome example for a carefully selected set of Buffalo nickels. Scarce in relation to the regular four-legged 37-D nickel, there are enough 3-Legged examples for collectors to acquire one, even in the lower Mint State grades.

PCGS 457, NGC 644. The most recent example to sell brought \$3,120 in April 2022 and the current PCGS Price Guide value is listed at \$3,500. It is at MS63 and MS64 where the price point may elude some collectors. This is a great example for the collector.

An attractive and brilliant PQ GEM example of this popular Buffalo issue. After a hiatus of 20 years the mint began striking Proofs for collectors again in 1936 and they were struck in both a Satin and Brilliant format, the Brilliant finish proving more popular. This one has great mirrors and bold flashy fields. The strike is crisp and full and the eye appeal is wonderful.

PCGS 334, NGC 198, CAC 102. While the current CAC CPG value is \$2,020 and the Collectors Universe value is \$2,250, the most recent NGC/CAC example sold for \$2,880 in August 2021. There are NO spots. Every detail is pinpoint sharp in strike. The eye appeal is phenomenal!

With just two coins graded finer at PCGS in the CAM designation, this 1865 Proof half dime is not just a high grade example, but it is also a beautiful example of this Civil War issue.

Exquisite quality mirrors beam with a strong watery reflection in the fields that amplifies the sensational rainbow toning that graces both sides. The central areas of the designs are blazing untuned silver with the surrounding bands of blues, golds, pinks, and purples that frame that brilliance. The surfaces are flawless and the eye appeal is, simply put, absolutely stunning!

Legend Rare Coin Auctions is proud to offer the Meridian Collection of Proof Barber Dimes. This wonderful collection ranks near the top of the PCGS/CAC Registry Sets of the series.

The consignor has been an avid coin collector for over fifty years and a proficient numismatist who has assembled several extensive collections consigned to various auctions over the last twenty years, including several previous Legend Regency Auctions. He decided several years ago to put together smaller sets of Proof coinage of various unappreciated series of coins. It is our honor to now offer The Meridian Collection of Proof Barber Dimes. One of these sets was the Meridian Collection of Proof Liberty Nickels we sold in Regency Auction 34.

Every coin in this set is either a Gem or Superb Gem grade,

most displaying Cameo or Deep Cameo contrast. The coins placed into these collections have been carefully selected for the strong eye appeal and high grades. While not all of the coins were the highest graded, many are among the finest certified, and each was specifically collected for its visual effect. The quality of the coins is acknowledged by the 100% CAC approval. A number of coins are from previous Legend Auctions or were from some fantastic collections, including Denali and Simpson.

The collector is constantly working on other collections, and is currently moving on to another area of numismatics, and as he goes on to other series of coins, he felt that this is a good time to return these Gems to the collecting community for other collectors to enjoy as much as he did. He wishes everyone the best of luck in bidding on these great Proof Barber Dimes!

A very high end and exquisite quality PR67 CAM, deserving not just the assigned grade from PCGS but also the CAC bean of approval. Everything about this coin is spectacular.

Flashy reflective mirrors beam boldly all over on this lovely SUPERB GEM. Splashes of pale gold and iridescent toning grace the obverse with somewhat deeper patina across the reverse. Accents of the original brilliant silver surfaces gleam from below the patination. The watery and sleek mirrors beam boldly, creating the great Cameo contrast.

What a way to end this magnificent Proof Barber Dime set. This coin is a MONSTER ULTRA HIGH-END piece!

If this piece were in a PR68 Cameo we would not flinch (no promises)! Exceedingly deep mirrors border on Deep Cameo status. The mirrors are crystal clear and remarkably clean. When you twirl the coin all you see is deep rolling flash. A killer mix of green/gold/sky blue and some violet frame the peripheries all over. The contrast is so bold Miss Liberty looks like she was carved from a frosted block of ice. Every detail is needle sharp in strike and is loaded with thick frost. The eye appeal is jaw dropping!

ONLY 450 were minted. PCGS 1, NGC 5, CAC 1. PCGS has graded 2 in PR67+ Cameo with NONE higher. The last time a PR67+ Cameo sold, was way back in 2015!!!! That coin brought \$11,163. LOT 79

10C 1874-CC ARROWS PCGS AU55 CAC

Ex Rian's Bequest, as noted on the insert.

We have been totally enamored with this coin since it first appeared in auction in a Stack's 2009 Americana Auction. It had been discovered in Europe and consigned to the auction where it made its first market appearance. This near-Mint State example ranks among the half dozen FINEST seen by PCGS and is totally original. Only 10,817 dimes were struck at Carson City in 1874 and the vast majority of them disappeared into circulation where they would remain for ages. Many of the low grade examples likewise have issues that would preclude numeric grading. For an AU example this piece is VERY HIGH-END, in fact, we rank it a GEM AU!

The eye appeal of this TOTALLY ORIGINAL AU55 has only the lightest trace of friction on the highest points and in the fields. There is a bold luster that survives in the fields, surviving from its short time in commerce. It is quite interesting to contemplate how this coin, struck in the wild west made its way to Europe, and then saved for over 130 years before coming back to the United States in 2008. The wear is unobtrusive and even. The surfaces are richly patinated in an antique silver-gray with pearlescent brilliant accents. Crisply defined and mark free, the eye appeal is amazing for the assigned grade.

PCGS 1, NGC 2, CAC 1. This coin brought \$114,000 in January 2022 and the current PCGS Price Guide value is listed at \$125,000. Just Five examples are graded higher at PCGS, two in MS62 and three in MS63. With the extreme rarity and desirability of this date, we have no doubt it will see very spirited bidding when it crosses the block. Good luck!

Among the FINEST KNOWN examples of this Proof Barber dime date. Pristine and FLAWLESS mirrors beam vividly from all over. They have extreme clarity, cleanliness, and offer a high power reflection. The sharply struck devices are frosty and there is a hint of cameo contrast when you twirl the brilliant mirrors in a light. Both sides are richly toned with cobalt-blue, gold, and rose that really pop when the light hits the shimmering mirrored fields. The surfaces are incredible and the eye appeal is off the charts AMAZING! What else is there to say but "WOW!"

The 1945 Mercury dime is a study in strike rarity. Over 159 million were struck thanks to a booming wartime economy, and little care was taken in striking. A rich, satiny mint frost blooms boldly on both sides. Virtually untuned save for the most subtle dusting of iridescent golden accents the high end nearly pristine surfaces. The central reverse band is fully split, making this a very important opportunity for the advanced Mercury dime collector.

LOT 93

25C 1823/2 PCGS AU55

Legend Rare Coin Auctions is honored to offer one of the greatest rarities of the Capped Bust quarter series, the 1823/2 quarter. Depending on which census you consult, this coin is either the 3rd or 4th finest known from an entire known population of 30 or 31 examples. Mint records from the year show 1,800 delivered on February 3, 1823 and an additional 16,000 were delivered on December 31. Scholars in the series believe that the actual mintage of 1823 quarters were those delivered in February, and since no records show a mintage of quarters in 1824, it is thought the 1824 examples were minted late in 1823, and none were struck in 1824. Since the quarter denomination had been sporadically produced, and in smaller numbers than the half dollars, the 1,800 mintage of 1823 quarters went into circulation and remained there for ages. The entire 1823 mintage was produced from a single pair of dies, the obverse left over from 1822 and a 3 was punched over the final 2. The Browning-1 die marriage, with 30-31 known in all, this is an extremely RARE and important Rarity-6+ die marriage, missing from most collections of early quarters. The average survivor is apt to be heavily worn and/or damaged in some way. Coins graded VF or XF are eagerly sought by serious collectors of means, and precious few survive in high grade. Behind the Proof 64, an AU58+, and an AU58, comes the presently offered PCGS AU55, and housed in the same old green tag holder it was in when it made its first modern auction appearance as part of the Benson Collection in February 2002. It has been in the same collection since January 2003, and thus is totally fresh to the numismatic market!

The surfaces are distinctly Prooflike, as to be expected of a die pair that was also used to strike a Proof example. Being high grade, the minimal amount of circulation failed to take off that delicate finish from the fields. Both sides are deeply and attractively toned in a deep blue-gray patina with iridescent olive, rose, russet, and dark golden-brown accents that come out when rotated in a light. The details show full and crisp definition, with barely any perceptible wear of any kind. In comparing the photos of the AU58 and AU58+, the reverse definition on this AU55 is fuller and shows more complete detail on the eagle's wing feathers. (Indeed, the cataloger of the 2002 Superior ANA Auction specifically noted that this coin was "finer than the R. Henry Norweb specimen" which ended up in the D. Brent Pogue Collection as PCGS AU58). When you look closely at the surfaces of both sides, you will see some minor traces of contact, which are noted for accuracy and will serve as pedigree markers on this very CHOICE AU example. The eye appeal is incredible for the date, which often times does not "come nice."

The pedigree of this wonderful example per Steven M. Tompkins extensive research is as follows: ex: Virgil Brand (?); C. David Pierce Collection, Numismatic Galleries' 1947 ANA Convention Auction, August 1947, lot 914; Edgar Levy Collection; Abe Kossoff's sale of the Edgar Levy Collection, May 1955, lot 16; Benson Collection; Ira & Larry Goldberg's sale of the Benson Collection, Part II, February 2002, lot 694; Superior Galleries' 2002 ANA auction, August 2002, lot 860; Steve Elwood; Jim McGuigan, sold to our consignor at the 2003 FUN show. Walter Breen listed the pedigree prior to the C. David Pierce Collection as being B.G. Johnson and Virgil Brand.

PCGS 1, NGC 0. This coin last sold in auction exactly 20 years to the day this description was written on August 3, 2002. The current PCGS Price Guide value is listed at \$175,000 and no doubt that estimate could be exceeded when this coin, totally fresh to the market crosses the block. It should be noted that the Anderson-Dupont; Norweb; Matthews; Meyers; Pogue AU58 realized \$246,750 in May 2015. This could well be a once in a generation opportunity that cannot be missed. Who knows when the next truly high grade 1823/2 quarter will appear in auction. Do NOT let this world class rarity pass you by!

This CHOICE Mint State B-2 sits comfortably in both the Rea-Koenings-Haroutunian and Tompkins Condition Census listings and is VERY appealing as both an example of the date and type. The obverse and reverse dies were workhorses, the obverse used to strike the B-1 and B-3 varieties as well, and the reverse was left over from 1834.

Crisply struck from a later die state with the die crack at 35 into the field by star 13 and clash marks on the reverse. A frosted, satiny brilliance dominates a pearlescent silver with a blush of original patina at the rims. The eye appeal is sensationally bold and unmarred by any marks, lines, or other flaws that warrant any kind of mention.

This is an AMAZING 1897-S quarter! This coin is VERY HIGH-END and it is unquestionably one of the very finest known--maybe the FINEST KNOWN! It is one of two in MS67+ with NONE FINER!

Sensational surfaces are absolutely perfect. We used a strong glass, took our time looking around, and found ZERO imperfections of any size, anywhere. The texture is more of a thick satiny type with a moderate luster (original) which is more typical for the date, does make the colors stand out. Totally original shades of deep champagne/pale golden brown/pale olive color drape both sides. Miss Liberty and every detail is sharply struck and does stand out. The eye appeal could not be any more wonderful!

PCGS 2, NGC 1, CAC 2. The other coin is other Gardner coin. In its most recent appearance, January 2020, it brought \$43,200. The current PCGS Price Guide value is listed at \$47,500 and we have no doubt this coin could approach that level when it crosses the block in September 2022. Worthy of the FINEST Barber quarter set, it should be noted the Pogue Collection contained a MS66+. This is a very important opportunity not to be missed!

Tied for second finest graded by PCGS, bested by a single MS67+. Frosty, fully lustrous satiny silver brilliance has a vibrant sheen in the light. Boldly and crisply struck up with exacting precision, this remarkable GEM looks as fresh today, as it did when it fell off the dies. The eye appeal and technical quality stand out!

PCGS 2, NGC 1, CAC 2. Most recently selling for \$21,600 in March 2020, this SUPERB GEM brought a near-world record price. There is a single MS67+ finer, and that coin should it appear would likely bring \$30,000+. This is a fabulous example from one of the greatest collections of Barber quarters ever assembled! 25C 1904-O PCGS MS67+ CAC

Ex D. Brent Pogue Collection, as noted on the holder.

Tied for FINEST KNOWN to PCGS, this is a remarkable survivor of this early 20th century New Orleans mint Barber quarter. At the time, little attention was paid to mintmarked issues, and few were saved, of the nearly 2.5 million pieces struck, the typical 1904-O is well worn. SUPERB Mint State pieces are EXCESSIVELY RARE.

This is an immaculate example! Very well struck for the date, which often comes with areas of weakness--this one is fully struck up with razor sharp definition on both sides. A bold satiny luster highlights the earthy shades of green, blue, gold, and pewter. The eye appeal is totally original and exceptionally high end! This SUPERB GEM belongs in the FINEST of Barber quarter collections! One look and you will shout WOW!

PCGS 3, NGC 1, CAC 2. This is one of two PCGS MS67+s that appear at the apex of the Population Report. Realizing \$31,200 in the March 2020 sale of the D. Brent Pogue Collection, Part VII. The other MS67+ is the former Hugon-Gardner PCGS MS67 CAC that sold for \$41,125 back in June 2014. This is a true prize for the Registry Set collector and we expect it to realize a very strong price when it crosses the block. Good luck.

To the uninitiated collector, a mintage of 4.4 million might suggest a coin that was readily available in all grades. However, this date is EXTREMEY RARE in SUPERB GEM, with just four reported at PCGS and NONE at NGC.

Exceptionally lustrous surfaces glow from below a layer of the richest multicolored toning. With its gorgeous Magenta and tangerine hues at the rims and golden-russet in the centers, it is clear that this coin likely was stored in an old album. Sharply struck and highly attractive, this SUPERB GEM cannot be beat! More visually alluring in our opinion to the nearly untuned Pogue coin. WOW!

A totally incredible SUPERB GEM. A blazing and blisteringly lustrous beauty! Only 264,000 were struck, making it a semi-KEY date in all grades, and in the lofty, essentially PRISTINE state of preservation as offered here, this coin is EXTREMELY RARE. In fact this is the ONLY MS67 graded at PCGS, with just a single MS67+ grading higher.

Ultra brilliant original mint luster glows with an sensational untuned vibrance that makes this coin look like it just came off the coining press. Well struck devices stand out against the lightly striated fields. The polishing left the surfaces vividly flashy and with a subtle blush of the palest gold, the eye appeal is sensational.

Wow! What a highly lustrous, premium quality GEM that is oh, so close to a full MS67 grade. The surfaces swirl with a vibrant rolling cartwheel luster. Beautifully toned surfaces on both sides suggest that this coin sat unmolested for many, many years in an old paper envelope. Amber, gold, violet, with tinges of teal, olive, pink, and dappled original silver surfaces dazzle the eye. The strike is essentially full and the eye appeal is very high end and totally original. Formerly from the #1 ALL TIME SET, with the R.S.D. pedigree, you know that the quality is all there and then some, as well as having a SUPERB eye appeal.

In our opinion, not only is this coin a MONSTER and one of the very best 1892 Proofs, but we also rank it as one of the BEST PR Barber 25C period! If there were to be a prize fight for top of the heap, this coin would win every time!

Flawless mirrors are endless in depth. Even using a neutron microscope will yield ZERO imperfections. When you twirl the coin, the mirrors look like a freshly formed sheet of ice. The obverse has a jaw dropping ring of neon like original blue/green/violet/gold colors that open into white centers. The reverse has a thin band of the same and is mostly white. The contrast is stunning. Miss Liberty and the details are needle sharp in strike and have thick frost. Mother Nature did an amazing job here. The eye appeal is so strong your eyeballs will pop out and roll around forever!

"The WOW factor is seriously off the charts here! Yes, indeed this coin is a very real borderline PR69! We rank this as one of the all-time greatest Proof Barber Quarters that exists! EVER!

Incredible mirrors beam in blazing from all over in a sleek like fashion. The mirrors have extreme clarity and cleanliness. When you twirl the coin, the mirrors glisten like freshly formed ice. Splashes of dappled golden-brown patina grace both sides, imparting a totally original look. The reverse has a near CAMEO contrast giving this coin a fabulous look! This one of only SEVEN examples in the entire series graded PR64 to earn the coveted gold sticker.

This is an old friend, a beautiful 1915 Proof Barber quarter that ranks near the top of the pop, that we have had the honor of selling before. We welcome this coin home and hope to see it reside in another world class Proof Barber collection!

This is a simply STUNNING SUPERB GEM example of this final Proof Barber date. The mintage of 450 is one of the lowest in the series, and this one is

among the absolute FINEST graded examples at PCGS. This PR67+ has all the attributes that advanced collectors demand from their coins. Ultra flashy mirrors beam from all over with a watery reflective sheen that dazzles the eye. A lovely layer of totally original toning has a very unique pattern that is a delight to behold. Here is a wonderful example of this important KEY DATE early Washington quarter. A true delight to behold, it has a lot going for it! First off, this coin has very strong claims to GEM. While we do not guarantee it, we could see this coin in a 65 holder and would not flinch, there is just a tiny mark hidden among Washington's hair curls. Its bold, swirling luster has vibrant rolling cartwheels accent sensationally clean and mostly untuned surfaces. A dusting of the clearest gold iridescence on the obverse and some deeper areas of toning at the lower reverse periphery. The devices are sharply impressed and offer crisp definition from an exacting blow from the dies. Second, this coin is housed in a highly desired PCGS generation 2.1 holder, which was in use from October to December 1989, which is highly collectible among a subset of collectors who specialize in the evolution of certified holders.

PCGS 678, NGC 232, CAC 74. RARE finer. This coin is more attractive than the example that brought \$5,160 in May 2022 and a coin that will certainly leave all published levels in the dust. NOTES

THE *Perfection* COLLECTION

The Perfection Collection. Legend Rare Coin Auctions is honored to present in Regency Auction 54 the astonishing Perfection Collection of Capped Bust Half Dollars. A collection decades in the making, starting in the 1980s, Mr. Perfection, as he is known in the hobby, caught the Bust Half Fever, and over the course of these nearly 40 years, has owned many great examples, from AU to MS67. The 33-coin PCGS Date Set Registry Set begins with 1807 and ends with 1839-O. The coins in this set, which ranks as the current #2 set on the PCGS Registry, and #3 all time, as well as being the #2 CAC Registry Set.

"I have known Mr. Perfection for decades, and he has been an active and astute buyer from both Legend Numismatics and Legend Rare Coin Auctions," said Laura Sperber, founder of both Legend firms. "As his chosen online 'handle' suggests, every coin had to be nothing less than perfection! We congratulate him in the historic offering we will be presenting."

"I have had the majority of this set for many years," said Mr. Perfection. I was missing one coin, the 1807 and could not find one I liked. Following Laura Sperber's advice, 'do not buy a coin just to fill a hole, be patient,' I waited. Finally, I bought the coin in the collection from the Eugene Gardner Collection, previously having been part of the Col. Green and Eric P. Newman Collections."

"The coins are all amazing!" declared Greg Cohen, senior numismatist for Legend Rare Coin Auctions. Having handled many of the greatest Bust half dollars offered in the last 5 years (LRCA sold the Konstantine Collection, the Chicago Collection, and the Dale Friend Estate), that is a powerful statement. All but one coin is CAC approved; several trace back to the famed Eliasberg Collection; there are a number of coins housed in old green tag holders, and these coins are fresh to the market. Each coin is a highlight!"

50C 1807 SMALL STARS O-113 PCGS MS63

**FROM THE PERFECTION COLLECTION OF CAPPED BUST
HALF DOLLARS**

Ex Green/Newman, as noted on the insert.

What a lovely and CHOICE way to begin the Perfection Collection. The mint struck two distinct half dollar types in this transitional year; the last year of the Draped Bust design and the first year of John Reich's new Capped Bust design. This endearing design was struck with a lettered edge on a screw press from 1807-1836, and is among the most passionately collected series in all of American numismatics. Four die pairs were utilized to strike 750,500 examples. Mint State examples of this variety are few and far between, PCGS has graded just 10 Mint State coins in total, with just two finer. Indeed, while listed first in the set, this was the last coin Mr. Perfection needed to complete this set, attesting to the challenging nature of the date to find with the right "look."

Bold rainbow iridescent rings halo about the lustrous silver untuned centers. Light lines, perhaps indicative of an ancient, very light cleaning explain the assigned grade (and not being CAC approved), but the eye appeal is bold and this coin is among the finest certified of the Small Stars variety. Adding to that eye appeal is the crisp strike, with nearly all the details fully formed. The eye appeal is truly amazing for the assigned grade.

The O-113 offered here is traditionally been referred to and listed as the Small Stars obverse. It was determined in the cataloging of the D. Brent Pogue Collection, that the O-113 and O-114 Small and Large Stars are actually the same size; the subtle difference in placement and rotation of the stars created an optical illusion and it was not until digital photos were rotated and overlayed that this discovery was made.

HALF DOLLARS

A fabulous 1808 half dollar, among the dozen finest known by PCGS regardless of Overton number. The present GEM O-106a is the SINGLE FINEST struck from this pair of dies.

Blazing, swirling cartwheel luster is bold and intense for an early Capped Bust half dollar. The strong satiny luster glows throughout the surfaces bringing the gentle dusting of iridescent toning to life. The shades of antique pewter-silver mix with golden-tan, russet, and the palest iridescent lilac-gray hues really add to the outstanding visual allure of this PQ GEM. An arching die crack from the obverse rim at 11:30 curves through Liberty's cap, through her hair curls, down along the drapery and clasp down past the 1 in the date to the rim, defining this advanced later die state. Mostly well struck with exceptional definition throughout with just a hint of weakness at the left wing. The eye appeal is sensational in every way!

50C 1809 III EDGE O-107 PCGS MS64+ CAC

FROM THE PERFECTION COLLECTION OF CAPPED BUST
HALF DOLLARS

An absolutely AMAZING GEM quality O-107 with the experimental III edge device, and is the second finest of all III Edge 1809 half dollars. The fifth edition Overton Census is 65,65,63,63,62, and this coin, having been called GEM BRILLIANT UNCIRCULATED in 1984 and 1997 is likely the second MS65 listed.

This fabulous coin boasts a vibrant, brilliant, frosty mint bloom that glows boldly on both sides. Sweeping cartwheel bands highlight the amazing quality surfaces. The obverse and reverse peripheries show stunning blue and crimson accents that blend into a dusting of clear gold across the centers. Pristine fields and sharply struck devices compliment each other quite beautifully adding to the exceptional eye appeal.

From the beginning of the denomination in 1794, the edge had a lettered device which read FIFTY CENTS OR HALF A DOLLAR. The lettered edge was placed on the planchets by running them through an edge milling or casting machine. Two dies which split the phrase in two parts: FIFTY CENTS OR on one and HALF A DOLLAR on the other. In 1809, reeding (III) or cross hatches (XXX) were applied to the device on some of these. It is thought that by adding the III or XXX would make the process more efficient. Don Taxay estimated that only about 20% of all 1809 half dollars produced had these experimental edges. While designed to make the process more efficient, these edge devices were utilized on 1809 halves only.

Ex John Glenn Halsell, Jr. Collection, Stack's March Sale, Part II, March 1984, lot 560; Stack's, December 1997, lot 2207; Eugene Gardner Collection; Heritage's sale of the Eugene H. Gardner Collection, Part III, May 2015, lot 98447 (as PCGS MS64 CAC).

The other coin was the Chicago Collection MS64+ that realized \$30,550 in September 2021. This coin, in our opinion, is nicer, and realized \$32,900 in May 2015. The current Collectors Universe value is listed at \$36,000 and we expect that level will be surpassed when the hammer falls. This is an AMAZING coin that will delight any collector: type, date, or variety. Good luck.

**FROM THE PERFECTION COLLECTION OF CAPPED BUST
HALF DOLLARS**

A lovely, original, high Condition Census O-109, a somewhat scarce Rarity-3 die pairing.

This example is richly toned in a deep dove, pewter, and slate tone with accents of rose and lilac that come to the fore when the lustrous surfaces are viewed in a light. The O-109 die pairing appears to have had some minor issues during striking which adds to the charm of the variety. A number of die cracks and other flaws are noted in the Overton reference. This coin was struck from an early striking, where only one of these, a minor, very thin crack at D S of UNITED STATES has just begun to form and the dies show some light clash marks. The typical O-109 has areas of weakness at the peripheral dentils; this one shows nearly full denticulation on both sides. Indeed, this early die state shows sharp definition on both sides. Reviewing other examples enumerated in Stephen Herrman's AMBPR, this one shows a rotated reverse die (about 50 degrees off its normal axis). The eye appeal is quite nice for the assigned grade, with no visible marks of any kind to impair the great visual allure of this near-GEM 1810 half dollar.

50C 1811 SMALL 8 PCGS MS66+ CAC

**FROM THE PERFECTION COLLECTION OF CAPPED BUST
HALF DOLLARS**

WOW! This is a truly fabulous 1811 Small 8 half dollar. Struck from the O-110 die pairing, which is noted for the high quality of some of the examples (the sole finest 1811 Small 8 half dollar regardless of Overton number, an MS67+, is from the later state of this die pair) and is tied for second FINEST KNOWN for the O-110 pair.

This coin is totally original, making only its second modern appearance in the numismatic marketplace in this offering. Dusted with a wonderful polychromatic blend of verdant, hazel, russet, gold, olive, and other warm, earthen tones meld in a variegated and perhaps lightly dappled pattern. The highly lustrous surfaces bring out the subtle under- and overtones and accents of brilliant silver that belies the amazingly well preserved, virtually PRISTINE fields and devices. Struck from rotated, slightly misaligned dies. The central devices are crisp and fully defined, while the peripheries and details among the stars, legend, and lower reverse are a trifle soft. While not the later O-110a die state, and not displaying the defining die cracks, both dies show stress and fatigue, with heavy flowlines drawing the stars and legends to the edge. The eye appeal is exceptional in every way, making this borderline SUPERB GEM a true delight to behold.

Ex New England Museum Collection, Stack's Bowers, May 2013, lot 337.

PCGS 3, NGC 0, CAC 4. There are two graded MS66+ at PCGS. Clearly, due to crossover submissions, the Population data is somewhat flawed. What we can tell you is this coin brought just shy of \$50,000 in May 2013 as a PCGS MS66 CAC. The current Collectors Universe value is \$75,000. There are two coins graded finer at PCGS, a 67 and a 67+, and these would bring \$100,000 or more if they crossed the auction block today. As a Rarity-1 die pairing, this coin is IDEAL for a world class type set! Good luck.

50C 1812 PCGS MS66+ CAC

**FROM THE PERFECTION COLLECTION OF CAPPED BUST
HALF DOLLARS**

A sensational, virtually SUPERB O-110 that ranks just below the Eliasberg-Pogue MS67 as the top of the Condition Census for this die pairing (the 5th edition of the Overton reference lists the Census as 67,66,66,65,64). This exceptional 1812 half dollar is very special in every sense of the word!

A dynamic satiny mint frost blooms boldly from below a layer of iridescent patina that is deeper at the rims and fades to lighter golden-tinged silver in the centers. Medium teal-blue and olive-gold dominate the deeper toning, with accents of coppery-rose. Another early Capped Bust half dollar in this collection that features all the charm and character that these sometimes crudely made half dollars exude. A light die crack from the rim enters into the lower drapery folds at the tip of Liberty's bust line. This planchet was either unevenly rolled or had a minor clip at about 10:00 on the obverse, as the dentils are not completely struck up, as the blank lacked the metal to flow into the die's recesses. The central devices are exceptionally crisp and very well executed. The dies were slightly rotated and lightly clashed. The surfaces are completely devoid of any contact or flaw of any kind and the quality and eye appeal are ultra high end and SUPERB!

PCGS 12, NGC 16, CAC 8. There are three graded MS66+ and just the single aforementioned Eliasberg-Pogue MS67 finer. The other two MS66+ examples sold within the last year or so: an O-105a sold in August 2021 for \$45,600 and in our April 2022 Central States Regency Auction 51 offered the Eliasberg O-107 at \$42,300. The current Collectors Universe value is listed at \$50,000, and it would not shock us if this beautifully toned and awesomely preserved MS66+ brought that or more! Good luck!

50C 1813 PCGS MS65+ CAC

**FROM THE PERFECTION COLLECTION OF CAPPED BUST

This GORGEOUS GEM O-103 is among the VERY FINEST KNOWN of the O-103 die pairing. Listed in the Stephen Herrman AMBPR as an O-103'a', the "a model" being defined by a thin die crack at the base of D ST. On the present example this die crack is barely visible, seen only with the aid of a glass. In the listing, this coin ranks at the top of the Census, as it was graded MS66* by NGC when it made its last auction appearance in 2009. Tied for SECOND HIGHEST of all 1812 die pairings at PCGS with just a single coin graded finer!

Dramatic old album toning created a bold halo of rainbow toning that frames both sides of this lustrous GEM. Bold swirling cartwheel luster rolls smoothly and unimpeded over the sensationally clean surfaces. Struck from clashed dies, there are some minor unlisted die cracks on the lower obverse near the date which adds to the exceptional charm and visual allure of this "plus"-graded GEM.

Ex Kaufman Collection; Joseph C. Thomas Collection, Heritage, April 2009, lot 2411 (as NGC MS66*).

PCGS 5, NGC 6, CAC 4. There are two MS65+s graded by PCGS and just a single MS67 finer. The other MS65+ sold most recently in the 2021 ANA auction for \$36,000. With just the Col. Green-Eric Newman- Bob Simpson PCGS MS67 CAC graded higher, a coin that realized \$96,000 in September 2020, this GEM will certainly bring a strong price when it crosses the block and we would not be shocked if the \$42,500 PCGS Price Guide value was exceeded when the hammer finally falls. Type and date collectors take heed of this VERY IMPORTANT opportunity. Good luck!

What a fabulous borderline SUPERB GEM that is tied for SECOND FINEST KNOWN for the O-103 die marriage. This beautiful coin also happens to be an old friend, last selling in our Regency Auction 28, where it was described as:

"An impressive GEM that borders on the SUPERB category! Everything about this coin is superlative. It is hard to imagine how this beauty survived in such an exceptional state of preservation.

Both sides are cloaked in a blazing silver cartwheel luster that rolls with stunning brilliance over uber-smooth fields and around crisply struck devices. On the obverse, every strand of Liberty's hair, every drapery fold, every crease in her cap, every star is boldly defined; on the reverse every shield line, every feather detail is strongly delineated. The raised die line connecting the ribbon to the eagle's sinister wing is the attribution point of O-103, making this a very interesting die variety for the collector. A totally original antique gold mixes over vibrant silver centers, deepens to a deep sunset-orange and a ring of brilliant blue at the extreme periphery. The surfaces are especially smooth and even using a strong loupe there are zero flaws worthy of mention. Both sides are exactly centered with full dentils. The eye appeal is simply STUNNING. Solidly in the Condition Census, this coin is the 3rd FINEST known, with two coins listed numerically higher as having sold in auction, per Stephen Herrman's AMBPR, both graded by NGC as MS67 and MS68*."

Ex David Lawrence Rare Coins, via private treaty in October 2012; Eugene Gardner Collection; Heritage's October 2014 sale of the Gardner Collection, lot 98466; Konstantine Collection, Legend Rare Coin Auctions' Regency Auction 28, September 2018, lot 20.

PCGS 5, NGC 7, CAC 4. There are two coins graded MS66+ on the PCGS Population Report and just a single MS67 sitting at the APEX of the Pop Report. This coin realized \$42,300 four years ago, and as the results from our more recent sales of the Chicago and Dale Friend Collections have shown, top quality Bust halves are even more popular than ever! The current PCGS Price Guide value is listed at \$55,000 and a sensational GEM like this should bring around that amount when the gavel falls. We wish you the best of luck in bidding, the action will be intense!

50C 1815/2 PCGS MS64+ CAC

**FROM THE PERFECTION COLLECTION OF CAPPED BUST
HALF DOLLARS**

Ex Eliasberg, as noted on the insert.

One of the **FINEST KNOWN** 1815 half dollars that exists boasting the greatest of all classic numismatic pedigrees: Louis E. Eliasberg, Sr. The 1815/2 is the classic date to the series, all 47,150 examples were produced from a single pair of dies, and most of these went into circulation. Hours after the mint delivered the entire mintage to the cashier, one of the buildings on the mint complex, which housed the machinery to roll silver and gold planchets burned to the ground and would take until 1817 for the mint to be able to strike any gold or silver coins again. The economic aftermath of the War of 1812 caused the mintage to plummet from over a million in 1814 to the 47,150 struck late in 1815, and in an effort to save expensive die steel, a left over 1812 die was repunched with a 5 creating the 1815/2 overdate. Since no half dollars were struck in 1816, the majority of 1815 went into circulation and the typical example is moderately to heavily worn.

The present Eliasberg O-101a, sits at the top of the Herrman listing, called "MS65" as it was in the April 1997 sale of the Eliasberg Collection. Deeply and richly toned, described as "Frosty silver gray surfaces display hints of light gold and electric blue around the borders." The frosted, satiny underlying brilliance brings the variegated hues to life and accents the sharply struck devices. This lovely GEM was struck from a doubly clashed pair of dies and some thin die cracks, including the one that encircles the entire reverse. The surfaces are generally clean and the only mark we feel is worthy of mention is a single minor depression just off the eagle's beak, which serves as a pedigree marker for the coin, always linking it to the **AMAZING** Eliasberg cabinet. The eye appeal is truly amazing!

Ex Chapman Brothers, January 1900; J.M. Clapp; John H. Clapp; Clapp Estate, en bloc, to Louis E. Eliasberg, via Stack's in 1942; Louis E. Truly a SPECTACULAR O-107! The SECOND FINEST KNOWN example from this pair of dies, and tied for second HIGHEST GRADED at PCGS. While listed as Rarity-3 in Overton, Stephen Herrman's listing in the AMBPR lists this die pair as Rarity-4+. Either way, this coin is certainly high up in the Condition Census, making it an important offering for any Bust Half Nut.

Razor sharp in strike from a very early reverse die state, showing the C in 50 C boldly recut at the base and missing the small die cracks that are seen on the other SUPERB example, the NGC MS67 Earle-Eliasberg-Thomas coin. Wholly original and boasting splendid ivory, olive, and russet-gold patina over glowing brilliant antique silver surfaces. The devices show full, crisp definition. The look is very similar to the Eliasberg specimen, suggesting that this coin, at one time was a part of another classic old time collection. The surfaces are essentially flawless and only a powerful loupe will aid in the location of some of the tiniest traces of contact anywhere, none of which have any kind of impact on the AMAZING eye appeal.

Ex Bowers & Merena, September 2008, lot 319; Heritage, January 2009, lot 3846 (as NGC MS66), unsold.

PCGS 4, NGC 1, CAC 3. No CAC-approved example has ever sold in auction. The Pogue Collection contained two of the three MS66s graded by PCGS--an O-106 and an O-113. The O-106 last appeared in our sale of the Chicago Collection in September 2021 for \$32,900; the O-113 has not sold since its initial offering in 2015, where it realized \$58,750. Among the **FINEST KNOWN** O-111s that survive, and only a single NGC MS67 (last sold in 2002) could rival this borderline **SUPERB GEM** for top spot at the high end of the Condition Census.

The cartwheel luster rolls so brilliantly on this high end GEM you might mistake it for an 81-S Morgan dollar. The most subtle dusting of pastel iridescence pops in the light, depending on the angle it is mostly antique silver gray with hints of lilac and gold. The devices are crisply struck from lightly clashed dies, you can see the outlines of Liberty's portrait surrounding the eagle. The eye appeal is incredible.

This GEM is among the FINEST KNOWN O-102, which, contrary to the notation on the PCGS insert, is a Large 9 Red Book variety, not a Small 9. The 5th edition of Overton lists the Condition Census for this variety as 66,66,65,65,65 and the listing in the AMBPR supports this. As the calendar rolled from 1818 to 1819, five obverse dies left over from the previous year were repunched with a 9 over the second 8, creating six distinct overdate varieties, the most for any single year in this series that is full of overdates.

This is an incredibly beautiful GEM! Everything about it is very high end! Both obverse and reverse (especially) are boldly and vibrantly toned with an expressive and dappled blend of coppery-gold, deep brick red, purple, and azure hues. Rotating the frosty lustrous surfaces in a light, the subtle nuances of the toning pattern and polychromatic palette burst to life imparting a visual allure rarely encountered on this type. Exacting definition from a precision blow from the dies rendered every detail crisply and to the fullest, again, a feature that makes this coin all the more eye appealing!

Both sides are dripping with a resplendent cartwheel luster that blazes across the exceptionally clean and high quality surfaces with a bold, rolling flow. This coin is closer in brilliance to a superb gem Morgan dollar than the typically encountered Mint State Bust half. Classic old time collection toning graces both sides. Warm tangerine-rose and apricot-gold at the centers are framed by a halo of teal-blue toning. A rich frosted luster has a satiny sheen that highlights the color. HALF DOLLARS

Arguably the FINEST KNOWN 1829 O-108A and tied for FINEST GRADED 1829 half dollar at either service. The later die state of this reverse die is identified by the final A in AMERICA filled at the top. The die marriage is identified by the die lines in front of the bust and recut 5 in 50C.

This is one of the most beautiful examples we have had the pleasure of handling--simply stunning and ultra high end. Blazing luster radiates boldly from below a dusting of Easter egg like pastel iridescent toning. The reverse is particularly dramatic and attractive, also particularly captivating with a wonderful concentric toning pattern in shades of tangerine, teal, rose, and gold. The eye appeal is amazing.

We are proud to offer this SINGLE FINEST 1830 half dollar certified by either service. Clearly this deeply and richly toned example is the FINEST of the O-115 die pairing and a sensational, totally original one at that. Housed in an old green tag holder, this is what a classic SUPERB GEM looks like, as this coin was graded ages ago, since housed in a generation 3.0 holder, this coin was graded between January 1990 and February 1993.

A bold and brilliant luster glows vividly below a rich layer of deeper olive, warm peach-rose, lavender, teal, slate, and gold hues blend together with the underlying original silver peaking through in places. Silky smooth surfaces are PRISTINE and the strike is wonderfully and fully rendered from an exacting blow from the dies. The eye appeal is excellent and very high end!

A totally original example that we are infatuated with! A spectacular and strong cartwheel luster blooms boldly across exquisite surfaces. The details are sharply struck from a late die state that shows a dramatic crack that spans the obverse from the lower right rim to the upper left, curving up through the bust. A truly amazing example of this final year of the Lettered Edge type, as the mint transitioned to the steam press and closed collar which allowed for a reeded edge, thus ending the first chapter of federal coinage in the United States.

One of the **FINEST KNOWN** examples of this important and historic transitional issue. The mintage is reported at PCGS CoinFacts as being 5,000, while the Red Book has it listed at 1,200+. Regardless, this is a virtual GEM survivor of a very small mintage, most of the known examples (CoinFacts estimates 1,000 in all grades) are well worn and many have issues that preclude 3rd party grading.

This is an old friend, having last sold in our December 2013 Regency Auction V. It is just as stunning today as it was back then! High end quality in every way! Magnificently clean, smooth surfaces are highlighted by a satiny mint frost. Both sides have a rich blanket of iridescent pale blue, soft olive-green, lilac, lavender, and slate patina. The devices offer a strong strike from a strong blow from the new steam press. The surfaces are nearly flawless and the eye appeal is that of an even higher grade.

FROM THE PERFECTION COLLECTION OF CAPPED BUST
HALF DOLLARS

We absolutely LOVE the look of this GEM 1837 half dollar! The eye appeal is great and the technical quality is fantastic. All in all this is an ideal example of this short lived Reeded Edge type with the 50 C. reverse.

A vibrant mint luster, glowing with a warm, satiny bloom is seen on both sides of this high quality example. Brilliant silver in the centers yield to a clear gold and rich teal at the periphery with the toning a touch more dynamic on the reverse. Sharply struck in the centers, the denticulation and stars are slightly soft in places. The eye appeal is truly impressive to be sure!

In 1836 the Philadelphia Mint finally achieved a long standing goal of having a steam driven coining press. This meant that striking pressure would no longer be as varied as when coins were struck by men using a screw press. The mechanics of the steam press allowed for more precise and consistent striking pressure, as well as more uniform sizes to coins. This would thwart many counterfeiters who would be unable to match the high quality of the coins now being produced. In 1837 these Reeded Edge Half Dollars flowed into circulation, and this one was obviously set aside and carefully preserved.

PCGS 25, NGC 44, CAC 11. There are just three in MS65+ at PCGS. Just a single PCGS MS65+ CAC sold in auction, realizing \$17,400 in November 2021. Among the **FINEST** ever graded by PCGS, there are just a trio in MS65+, and just four finer (3 in MS66 and a single 66+ finest). This is a fabulously preserved representative of this short-lived type. This is a coin that has so many WOW factors, it is truly a delight to behold for sure!

Exceptional, intensely brilliant surfaces gleam boldly from below a dappled blend of slate, amber, and russet tones. The toning is quite pleasing, attesting not just to the supreme originality of this GEM, but also adding to the impressive visual allure. The cartwheel luster blooms vividly on both sides with accents of semi-reflective flash, enlivening the color and sharply struck devices. A strong glass reveals a tiny tick or two, obscured by the toning, and bearing zero impact on the exquisite eye appeal. This is truly an amazing example of the type.

50C 1839 CAPPED BUST, LG LETTERS PCGS MS65+ CAC
FROM THE PERFECTION COLLECTION OF CAPPED BUST
HALF DOLLARS

Among the very finest of the date and a truly GLORIOUS GEM example of this conditionally challenging final year of the design type. While somewhat available in lower Mint State grades, up to and including MS64, there are but a half a dozen examples in GEM grade at PCGS. In 1836, Christian Gobrecht modified the John Reich and William Kneass's Capped Bust design for use on the newly installed steam press. This 1839 is a popular transitional year, switching from the Capped Bust design to the Seated Liberty.

A fabulous example of this date! A brilliant, billowing, and satiny mint luster accentuates a soft, clear gold patina that clings to the rims and throughout the stars, a trifle stronger on the reverse. The swirling cartwheel brilliance provides a sensational contrast between the satiny fields and the sharply formed devices. The strike is crisp, displaying full, complete definition to Liberty's hair curls, drapery folds, and eagle's feathers. The star centers and dentils are fully defined. While this is a type that is often seen lackluster (even in Mint State grades), with splotchy or dark toning, this is a fabulous looking GEM of the first order!

50C 1839-O PCGS MS65+ CAC

**FROM THE PERFECTION COLLECTION OF CAPPED BUST
HALF DOLLARS**

For the first 45 years of a federally produced coinage system in the United States, the mint in Philadelphia produced all the coins needed for commerce. By the 1830s the economy and territory grew sufficiently to require a branch mint in New Orleans (as well as branches in North Carolina and Georgia to convert the native gold being mined into coins). The New Orleans mint began coining operations in 1838, after being established by an act of Congress in 1835. The number of half dollars struck that first year were limited to 20 proofs that are today among the most sought after classic rarities in the U.S. series. The 1839-O saw a limited mintage of 178,976 pieces, and the vast majority of them went straight into circulation. Precious few were saved in Mint State, with just a dozen examples graded MS65 or finer at PCGS.

This is a fabulous example of this important and historical issue. A strong, vibrant cartwheel luster swirls boldly all over this sharply struck and totally original toned GEM. This example was struck from a cracked state of the dies, with spidery peripheral cracks that add to the charm of this southern condition rarity. A gentle dusting of iridescent tone has a slightly dappled appearance at the periphery on the obverse while it is soft and pastel at the center and on the reverse. The is an incredible specimen, worthy of the FINEST of collections!

PCGS 7, NGC 7, CAC 3. There are two in MS65+, the other example having sold in the 2021 ANA auction for \$87,888. The current PCGS Price Guide value is listed at \$97,500. PCGS has graded five finer, and the last MS66 sold in the May 2016 Pogue Auction for nearly \$100,000 and the market for Capped Bust half dollars is stronger today. We expect this coin to bring a very strong hammer price when the gavel falls. Do not take this opportunity for granted, who knows when another example will appear in auction again!

PCGS 41, NGC 17. The most recent example to sell brought \$5,174 in August 2021. The current PCGS Price Guide value is listed at \$7,000. A lovely example for the date and grade, worthy of a date set or type set. Good luck.

LOT 157**50C 1836 REEDED EDGE GR-1****PCGS MS63+**

Ex Friend, as noted on the holder.

The year 1836 was a transitional year at the Philadelphia mint. Near the end of the year, new steam presses were installed, replacing the screw presses that were in operation since 1793. The benefit of the new technology, allowed for a standardized collar to be used on the coins, which would impart the edge reeding as the dies squeezed the planchet during striking. This

eliminated the need for the casting machine, and serving as the death knell of the Lettered Edge type. The small mintage (sources range from 1,200 to 5,000 struck) was produced using a single pair of dies. These are scarce in all grades, and a key issue in Mint State, especially in CHOICE or finer grades.

A fabulous example, fully CHOICE in grade. A satiny brilliance glows under a rich, original patina. Lovely antique pewter-dove is suffused with a soft azure, lilac, and rose iridescence on both the obverse and reverse. Sharply struck in general with bold crisp details seen on both sides. A glass reveals some minor ticks and flaws that account for the assigned grade, but has minimal impact on the visual allure of this important coin.

NOTES

LOT 171

50C 1944-S PCGS MS67

An incredible quality SUPERB GEM, tied for FINEST graded at PCGS and a world class example of this conditionally challenging date.

A brilliant, satiny mint luster radiates in the fields surrounding well struck devices. A precision blow rendered the devices with crispness not often seen (Liberty's thumb, often lacking in separation from her torso, is fully outlined). Both the obverse and reverse possess a very attractive, delicate patina. Visually very appealing, and essentially flawless, we do not know what CAC saw that precludes approval. In all this is an exceptionally high grade example that will delight even the pickiest of Walking Liberty half dollar collectors.

PCGS 12, NGC 13. The most recent example to sell realized \$40,800 in June 2021, and that was the first MS67 to sell since May 2005! Clearly not only are 44-S Walkers EXTREMELY RARE so fine, they also are in solid hands, tucked away in the infamous "black hole" of collections. The current PCGS Price Guide value is listed at \$42,500 and with NONE FINER, if you are looking to upgrade your set, do not let this opportunity pass you by, it might be YEARS before another example comes up for sale!

This is clearly an above average piece. It is totally ORIGINAL and not washed out or dull like so many come.

Exceptional surfaces are satiny and appear smooth. To the naked eye the coin appears clean. Only when using a strong glass you can see a slight scuff hidden in the dreaded right field. A full luster shows off light ORIGINAL soft white "skin". Miss Liberty and the details are frosty and have really sharp strikes (you do not need a glass to see anything). The eye appeal is excellent!

PCGS 126, NGC 58, CAC 57. The last PCGS/CAC piece to sell in major auction brought \$3,055 in May 2022. We promise, this coin is FULL Legend quality-you won't be disappointed!

You can tell this coin has been carefully stored since it left the bank 75 years ago. It's not easy to find a 47-D in this state of preservation!

Shimmering surfaces are also satiny and smooth. The luster is intense and unbroken. There are NO marks and the dreaded right field is clean! Both sides are blazing white and have NO toning. Miss Liberty and the details are frosty and have exceptional strikes. The eye appeal is fabulous!

PCGS 103 NGC 72, CAC 36. The last PCGS CAC MS67 to sell in auction brought \$4,400 in June 2021. The current Collectors Universe Value is \$2,500 -a number we think is VERY low. Do not let the pops fool you-these are really hard to find in REAL MS67 and frosty white!

The stark contrast between the frosted devices and watery fields gives this coin a fabulous look. There is no toning anywhere and the eye appeal is excellent, unmarred from any mishandling or other issues.

Only 1000 were struck, many of which went unsold and melted at the mint. PCGS 13, NGC 9. There has not been an NGC-graded PR64 CAM sold in a decade! The most recent example to sell was a PCGS-graded example that realized \$14,400. The current Collectors Universe value is listed at \$11,500. A GEM Proof Civil War date Seated dollar. As the war raged on demand from the few contemporary collectors shrank and only 470 Proofs were struck. Very few examples survive in such a lofty state of preservation, the typical Proof 1864 dollar is graded PR62 to PR64; Gem grade examples are RARE, and excessively so any finer.

This is a totally original example with clean, boldly reflective mirrors that beam with a brilliant watery feel on both sides. A gentle overtone of antique silver-tan and undertones of lilac-blue, pale gold, and soft peach-gold. Sharply struck, this example has a fabulous look.

Only 470 Proofs were struck. PCGS 18, NGC 13. While the most recent example sold in April 2022 for \$8,100 in April 2019 one sold for \$13,200. The current PCGS Price Guide value is listed at \$15,000. PCGS has graded a half dozen finer, but none of these have sold in auction. **LOT 185****\$1 1873 SEATED NGC PR64 CAC**

What an impressive borderline-GEM example from the final year of the Seated Liberty dollar series! This remarkable and very CHOICE Proof, housed in an earlier generation NGC "Fatty" holder and has a wonderful, old time and classic toning on both sides. Borderline CAMEO contrast on the obverse is seen between the glittering mirrored fields and the well struck, frosted devices. The reverse, likewise shows some claims to CAMEO at certain angles. The totally original splashes of multihued toning gives this lovely example a fantastic look. While careful inspection with a strong glass reveals a tiny line or two, and the central reverse displays the usual softness at the eagle's wing, the eye appeal is very high end for the assigned grade.

Only 600 Proofs were struck. PCGS 32, NGC 40, CAC 4. The most recent CAC-approved example sold in our September 2019 Regency Auction for \$5,758. The only NGC/CAC coin was the Rev. McClure coin that brought \$9,400 back in June 2016. The current CAC CPG value is \$6,940 and the Collectors Universe value is listed at \$8,250. Quite challenging finer, this example will delight any collector of Proof Seated type or specialized set of Proof dollars. Good luck.

Only 97,000 Trade dollars came off the Carson City dies in the final year this denomination was struck for its intended overseas trade purposes and the vast majority were exported and circulated heavily in Asia. It is considered a KEY Carson City Trade dollar issues in all grades and is VERY RARE in any Mint State grades.

This is a truly CHOICE and original MS63 example! Splashes of dappled multicolored toning burst from the surfaces, accented by a distinctly reflective, semi-Prooflike luster that beams below. The watery brilliance of the fields flash nicely. The devices are crisp and very well struck. Some old, stray marks, well hidden by the delicate patination, account for the assigned grade but have minimal impact on the outstanding eye appeal.

PCGS 7, NGC 6. The last one sold in October 2020 for \$25,200 and the current Collectors Universe value is listed at \$40,000. VERY RARE any finer, PCGS has graded fewer than a dozen higher. What a great coin for the advanced collector. Good luck.

A bold, watery reflective mirrored brilliance in the fields enhances the gold and iridescent toning that gently graces both sides. The sharply struck devices have a near Cameo appearance as you rotate the frosted reliefs in a light. The eye appeal is quite nice.

Only 900 Proofs were struck. PCGS 70, NGC 82. We think CAC is over-picky on these, only 5 examples in this grade have gotten CAC-approval. The current PCGS Price Guide value is listed at \$4,750. The Capped Die variety is avidly sought, and the name is a bit of a misnomer, some catalogers more accurately call it "CC over CC" Listed as a Top 100 variety in the VAM series, it is a popular Red Book listed issue. In the past, the Capped Die was thought of as "a poor man's 1879-CC," but modern research has proven how rare this issue is!

For a Capped Die, this coin is exceptional in EVERY respect!

This borderline GEM boasts a bold, frosty luster brings out the impressive clear gold toning that gracefully dusts both the obverse and reverse. This is a great and wonderfully toned GEM example of this lower mintage Carson City Morgan dollar. While not specified that this coin came from the vast GSA holdings in the early 1970s, it certainly has the bag toning that would suggest that origin. Teal and orange shades are the most vibrant, but as you twirl the lustrous surfaces in a light, lovely pastel iridescent gold, blue, and rose hues really pop to the forefront. We rate the color as a 9 on our 10-point color scale. Well struck, frosty devices stand out and are enlivened by a bold cartwheel brilliance. Truly worthy of the "*" designation assigned by NGC.

PCGS 1768, NGC 773. This colorful PQ GEM is worthy of a strong bid, in excess of the published levels. If you are collecting toned CC dollars or are looking for a special example for your set, do not overlook this opportunity. Bid accordingly.

Bands of deeper blue/green melds to violet-magenta, emerald, cobalt-teal, and lemon-yellow gold begin at the lower obverse rim, before repeating in a somewhat more mottled pattern above the ear to the upper periphery of the obverse. A trace of peripheral toning flows from the obverse to the reverse. We rate the color, which is amplified by the radiating S-mint luster, as an 8.5 on our 10-point color scale. Hidden under the colorful hues are some minor bag marks, which are all that keeps this from a GEM grade. \$1 1881-S PCGS MS66 PL

This dramatically and deeply toned 81-S is fully Prooflike on both sides, the reflective brilliance highlights the obverse toning beautifully! Deep aubergine and hunter-green are flanked by coppery-gold, magenta, emerald, brilliant gold and pastel blue iridescent toning. As you rotate the colorful obverse in a light, hints of canvas textile pattern from bag storage can be seen, giving this coin a great look. We rate the color an 8.5 on our 10-point color scale. The sharply defined devices are frosty and the eye appeal has a great look.

PCGS 545, NGC 522. You can feel free to ignore the prices realized for untuned white coins; this colorfully toned example will be fiercely contested for when it crosses the block. Good luck.

\$1 1881-S PCGS MS67+ CAC

A wonderfully preserved SUPERB GEM 1881-S dollar. Liberty faces an arching band of full rainbow toning that sweeps over the left side beginning at about 12:30 and widens as it slopes, counterclockwise through her hairline, across the bridge of her nose, and down to the tip of her neck. The color gives this MS67+ a dynamic look. A couple of ancient traces of a fingerprint are noted for the sake of full disclosure, but have minimal visual impact in hand. A crisp, clean strike and bold luster compliment the toning and adds to the wonderful eye appeal.

PCGS 3051, NGC 4839, CAC 1098. There are 410 graded MS67+ at PCGS. A slightly more toned example sold for \$3,643 in our April 2022 Regency Auction on an estimate of \$2,500-\$3,000. We expect this coin will sell for a strong bid when it crosses the block. Good luck.

The reverse has a dusting of iridescence that is brought out by a brilliant mint luster.

PCGS# 7154 | EST: \$1,500+

LOT 223

\$1 1884-S PCGS MS61

A real Mint State example of this classic condition rarity in the Morgan dollar series. While 3.2 million were struck, the vast majority disappeared into circulation and remained there for ages, as even AU examples are considered scarce, and any bags that were stored in Treasury vaults were melted down per the provisions of the 1918 Pittman Act.

A frosty luster accents a pearly, antique pewter/silver and golden-tan patina. Well struck the devices are fully rendered and have crisply defined devices. Some minor scratches and contact marks are noted and account for the assigned grade, but they do not detract from the eye appeal and this is not some "super slider" that just made it into a Mint State holder, this is the real deal!

PCGS 111, NGC 210. Recent APRs are clustered in the \$9,000-\$11,000 range and the current PCGS Price Guide value is listed at \$13,500. Mint State examples are always in demand and collectors take heed of this pleasing original example and bid accordingly.

\$1 1889 PCGS MS66+ CAC

Sensational, boldly lustrous and wonderfully preserved surfaces are unencumbered by any serious marks. Swirling silver luster radiates wonderfully on both sides. Overall the devices are sharp, though we note some minor weakness in the central hair curls. The eye appeal is very pleasing for the grade. Despite a huge mintage of 21,726,000, the 1889 is conditionally challenging at the MS66+ level and EXTREMELY RARE any finer.

PCGS 558, NGC 210, CAC 118. PCGS has graded 86 in MS66+. Three PCGS MS66+ CAC examples sold in April 2022, ranging from \$2,520 to \$3,840, including the one we sold for \$3,290. The current PCGS Price Guide value is listed at \$4,250 and this high end example should see very spirited bidding. Only a dozen are graded higher at PCGS, none of which have sold in three years!

LOT 228

\$1 1891-S PCGS MS65+ CAC

The 1891-S saw a mintage of nearly 5.3 million pieces, but a large number must have remained in Treasury vaults and melted down in 1918, as this date is scarce in MS65 and quite challenging any finer. It also has a distinction, known to collectors of toned dollars as not often coming with color. The present plus-graded GEM offers dual sided toning, likely imparted by long term storage in an old collector envelope. Dappled pastel iridescent lilac-gray, soft gold, pale clover, and powder blue hues dance across the vibrantly lustrous surfaces. Devoid of serious contact, and generally well struck, this is a great example for any high end set.

PCGS 612, NGC 228, CAC 91. There are 26 in MS65+ and fewer than 150 graded higher. The current PCGS Price Guide value is listed at \$2,750. The most recent sold for \$2,703 in our April 2022 Central States Regency Auction. We anticipate very strong bidding when this one crosses the block.

LOT 230

\$1 1893-S PCGS VF25

Only 100,000 struck, the lowest mintage struck for circulation and this date entered into circulation and, as evidenced by the condition of the vast majority of known survivors, they remained in commercial channels for ages, becoming well worn and abused over the years. Perhaps lightly wiped ages ago, the light silver-gray surfaces show some deeper hues at the peripheries. A few unobtrusive marks, not doubt acquired during its time in wild west circulation, are appropriate for the assigned grade and have little impact on the eye appeal of this important VF25 93-S.

PCGS 430, NGC 180. The most recent example in this coveted collector grade sold for \$6,000 in May 2022 and we have not had an example of this date/grade in nearly three years. The PCGS Price Guide value is listed at \$7,000 and this coin will occupy a place of pride in whatever collection it next graces.

LOT 229

\$1 1893-S PCGS VG10 CAC

Evenly worn, with a pleasing totally problem free "circ-cam" look. Deeper toning in the fields and soft beige on the design elements give this KEY Morgan a great look for the grade. Only 100,000 were struck and unlike other dates, these were not stored in Treasury vaults and were put into circulation during the Panic of 1893. If there were 93-S dollars stored in vaults, they clearly met their demise in the great melts of 1918.

PCGS 645, NGC 259, CAC 69. The most recent realized \$4,600 in April 2022 and the current PCGS Price Guide value is \$4,750. If you are still looking to fill this hole in your set, do not over look this coin. Any 1893-S dollar is a collector's prize, and in constant demand, from low grade to GEM Mint State.

LOT 231

\$1 1897-O PCGS MS63

The 1897-O is a major condition rarity in the Morgan dollar series, with MS63s being about as high a grade as you can get without breaking the bank. Because most of the 4 million piece mintage either disappeared into circulation or large quantities were stored in Treasury vaults to be melted down thanks to the Pittman Act of 1918. After 35+ years of grading, PCGS and NGC have graded a combined total 3,340 in ALL Mint State grades, MS60 to MS67, a figure that no doubt includes much duplication. Fewer than 100 have graded higher than the currently offered MS63. Rich pastel rose, sky-blue, lilac, and tangerine toning blankets the obverse while the reverse is framed by a delicate amber and lavender toning, devoid of color in the center. A few ancient ticks and lines account for the assigned grade.

PCGS 320, NGC 205. The most recent example sold for \$3,950 in March 2022 and the current PCGS Price Guide value is listed at \$3,850. In MS64, the value jumps to \$12,500.

WOW! Tied for FINEST GRADED in the Prooflike designation. There aren't enough accolades and adjectives to express how incredibly rare and important this offering is! Serving as the PCGS CoinFacts plate, this is a top tier example of this lower mintage (only 330,000 were struck) Philadelphia mint Morgan dollar.

An incredible, blazingly brilliant borderline SUPERB GEM. Flashy, reflective fields have a blinding luster and are boldly mirrored. The fields are essentially flawless to boot, with barely a line, tick, or other kind of mark worthy of mention. Sharply struck and thickly frosted devices stand out with a bold contrast to the surrounding fields. The most delicate dusting of iridescent toning graces the surfaces, giving character and charm to the outstanding visual allure of this very high end and wonderful survivor.

PCGS 16, NGC 5, CAC 2. There are but two graded MS66+ PL at PCGS with NONE FINER. We sold the other coin for a record \$7,344 in our September 2019 Regency Auction. The current PCGS Price Guide value in this grade is \$7,500 and we believe this wonderful example, when it crosses the block could exceed that level. Bound for a world class Registry Set of PL Morgan dollars and will see strong bidding. Good luck.

This coin has a delicate clear-gold and pearlescent silver toning that is a delight, accented by the underlying satiny brilliance. Well struck overall, with just a hint of softness on Liberty's hair curl above her ear. The eye appeal is high end for the assigned grade.

LOT 241**\$1 1923-S PCGS MS65+ CAC**

Rarely found in GEM grade, the 23-S is a major condition rarity. Although plentiful in terms of strict mintage figures, tracking down a GEM example becomes a monumental challenge because of the weak strikes associated with the date. As we all know, 1923-S do not come looking like 1923 P's. In fact, they generally do not come looking great at all. This is in fact a stunning, totally ORIGINAL GEM! Its quality and eye appeal worthy of the assigned grade and CAC approval!

This date is quite scarce in GEM grade and EXTREMELY RARE any finer. An MS65+ is likely the finest grade example most collectors can afford to own.

An incredible brilliant luster radiates boldly all over! Overall, this coin appears clean, and only with the aid of glass can you find a few trivial superficial scuffs and frost breaks, but none are deep or serious. The luster is way above average for the date. Both sides display a hint of gold. Most important, Miss Liberty and the details are frosty and are sharply struck. The eye appeal is excellent!

PCGS 223, NGC 85, CAC 16. There are 14 in MS65+ at PCGS with a mere four coins graded higher, a single MS67 the finest. The only PCGS MS65+ CAC to sell in auction brought \$25,850 in our September 2019 Regency Auction 34. More recently a PCGS MS66 sold for \$49,200 in August 2021. Love this frosty white SUPERB GEM!!!

Superior SUPERB GEM surfaces are satiny and clean overall. Only when using a strong glass can you see a few minor frost breaks. The luster is super strong. There is a thin hint of gold by the obverse rims and the rest of the coin is satiny original white (this is NOT a dull coin). Miss Liberty and the details are frosty and fully struck. The eye appeal is gorgeous!

PCGS 69, NGC 106, CAC 30. The last PCGS CAC piece to sell in auction brought \$10,600 in February 2022. The current PCGS CAC value is \$10,000. Good luck finding another as nice!

Bold rolling radial cartwheel luster defines this conditionally challenging date. Brilliant silver lustrous surfaces gleam with accents of iridescent white patina. Well struck and of near-GEM quality, this 24-S is sure to delight any serious Peace dollar collector.

PCGS 1599, NGC 1049, CAC 220. There are 169 graded MS64+ at PCGS. The most recent example to sell realized \$2,760 in the 2022 FUN auction and the current PCGS Price Guide value is listed at \$2,400. We expect strong bidding here, considering the CAC CPG value is listed at \$9,500 in MS65. An opportunity not to be missed.

\$1 1925 PCGS MS64 CAC

The image displays two views of a 1925 US Liberty Bell nickel. The left view is the obverse, featuring a profile of Lady Liberty facing left, wearing a Phrygian cap with stars. The inscription "LIBERTY" is at the top, "IN GOD WE TRUST" is at the bottom, and the date "1925" is at the bottom. The right view is the reverse, showing the Liberty Bell. The inscription "ONE CENT" is at the top, and "U.S. MINT" is at the bottom. The coin is heavily worn and discolored.

need a pretty toned Peace Dollar, look no further! The eye appeal is heart pounding! This high end coin is just a tiny tick or two from an even loftier grade, but it is the toning that sets this near-GEM apart!

This coin appeared in our March 2019 Regency Auction, lot 368, where it realized \$5,640 on an estimate of \$3,500-\$4,000. Prior to that, it realized \$3,760 in our June 2015 Regency Auction, on an estimate of \$750-\$850. Where this coin will end up today is anyone's guess, but we are sure it will yet again bring a strong bid!

LOT 246

\$1 1925 PCGS MS67+ CAC

For 97 years this coin remained safely tucked away. In that time, it has acquired a light natural blush.

The surfaces are amazingly clean, semi-satiny, and have a strong glowing luster. There is a light mix of totally original champagne/golden brown/lilac colors spread all over. Miss Liberty and the details are frosty and have an exceptional strike. The eye appeal is sensational!

PCGS 182, NGC 120, CAC 56. The last PCGS piece to sell in auction brought \$18,000 in December 2021 and was NOT CAC. A PCGS CAC 67+ sold for \$28,800 in August 2021. The current Collectors Universe value is \$30,000. We strongly believe this coin ranks in the top 5% for its grade and superior to most 1925 MS67's graded. Don't just take our word on it, see for yourself!

Quality like this you can NOT buy at the sheet levels or anywhere nearby. This coin will add value to any GEM set of Peace Dollars!

Ex J.D.C. as noted on the insert.

One of the **FINEST** 1925-S Peace dollars we have had the honor of selling. Its quality and eye appeal are off the charts! This date is **VERY RARE** in so high a grade, and is **UNIQUE** finer at PCGS, with just a single MS65+ graded higher.

The eye appeal is superb! We consider it very high end! If you did not see the S, you'd swear it was a common date! To start, the coin's surfaces are superior to most. They are ultra clean and satiny smooth. Both sides are highlighted by a strong luster that amplifies the totally original surfaces. The obverse is mainly untuned, just subtly "off-white" but brilliant and superb. The reverse must have been sitting at the end of a roll, which imparted a wonderful golden-rose patina on the reverse. The devices are sharply struck and the eye appeal is truly off the charts!

PCGS 54, NGC 74, CAC 9. This remarkable GEM realized a world record \$50,400 in the 2021 ANA auction. The current CAC CPG value is listed at \$48,000. The single finest MS65+ has yet to sell in auction (at the time of this writing), but will likely bring a high five or low six-figure realization. This exceptional GEM is worthy of a very strong bid and placement in a **WORLD CLASS** Peace dollar set!

The surfaces are super clean and satiny smooth. Only a few light frost breaks can be found if you use a strong glass. A strong luster shows off totally original silvery creamy white color. Miss Liberty and the details are sharply struck. The eye appeal is superb!

PCGS 885, NGC 4663, CAC 95. The last PCGS CAC piece to sell in auction brought a stupid cheap \$1,145 in December 2019. The current Collectors Universe value is only \$1,250. Reasonably well preserved surfaces show just some trivial traces of contact. The eye appeal is enhanced by a pleasing strike.

\$1 1928-S PCGS MS64+ CAC

The 1928-S Peace dollars is one of the toughest issues to find in a high grade, GEMS are VERY RARE. Many collectors will carefully select a high end MS64+ like this one for their sets. The strike is sharp, and the surfaces pleasing with only a few stray traces of contact noted when closely examined. Essentially untoned with a dash of russet gold and iridescent toning on both sides, accented by the exceptionally brilliant luster. The eye appeal is AMAZING for the assigned grade.

PCGS 2423, NGC 1368, CAC 312. There are 336 graded MS64+ and we suspect there is much duplication with crack outs, cross overs, and resubmissions in hopes of getting that illusive MS65 grade. The most recent examples have sold in the \$2,640 to \$4,348 range and the current PCGS Price Guide value is listed at \$4,250. It needs to be noted that a PCGS MS65 CAC will cost around \$30,000! The fields are ultra smooth and clean with an icy brilliance. A tiny contact mark on the cheek and neck are all that keep this keenly preserved and precision struck MS66 from an even loftier grade, but have minimal impact on the outstanding eye appeal.

Just two dozen examples ever graded higher at PCGS, and any PCGS MS66+ will cost into the five figures and a 67 will approach the six-figure level if one was to appear in auction. Here is a particularly nice specimen. Boldly struck with gorgeous lemon-yellow gold luster throughout. True GEM quality surfaces gleam boldly all over. Save for some minor roughness (practically invisible) on the planchet, this wonder coin pretty much is "as minted" and housed in a green tag holder.

Boldly prooflike surfaces are exploding with a megawatt booming luster. You can see some light striations and minor planchet roughness-but NO post Mint imperfections. The color is a totally original electric yellow with faint hints of reddish gold. Miss Liberty and the details are frosted and have remarkable needle-sharp strikes. The eye appeal is phenomenal!

ONLY 3900 were ever minted. PCGS 3, NGC 8, CAC 5 (def a resubmission). The current Collectors Universe value is \$22,500. By NO stretch is this anything but a VERY rare date! This will be a great coin in any GEM Type, box of 20, or Gold \$1 set. We'd also bet you will be so dazzled by this coin you won't ever put it down-we could not!

This early date New Orleans quarter eagle is scarce in all grades, coming from an original mintage of 33,580. Rich multicolored iridescent toning clings to the fields surrounding the devices. Just a hint of wear on both sides, if raw, this coin would likely be offered as AU, but we are grateful that no one dipped, stripped, or conserved this GEM XF piece, destroying the wonderful eye appeal!

PCGS 22, NGC 14, CAC 6. This is the only CAC-approved XF45 to ever sell in auction, bringing \$2,640 in September 2020. The current CAC CPG value is listed at \$2,780. This is a coin worthy of any collector grade set of southern mint quarter eagles. We expect strong bidding for this beauty.

PCGS# 7720 | EST: \$2,000+

LOT 264

\$2.50 1861-S PCGS MS62

A totally AMAZING and high end example of this conditionally VERY RARE date! Among the FINEST KNOWN from a mintage of only 24,000. David Akers noted: "this date is grossly underrated in the standard price guides. I have never seen a full mint state 1861-S. Specimens better than VF are genuinely rare." Today, a tiny number of examples survived without being placed into circulation. While gold coins were hoarded in the east as the Civil War raged, the western economy was gold based and the coins circulated extensively. PCGS has graded five coins in all Mint State grades, MS63 being the finest, and it should be noted that NO Mint State example has ever garnered CAC approval.

Incredibly lustrous and vibrant, the surfaces scream with a bold mint brilliance. Virtually every detail is crisply defined and fully rendered by an exacting blow from the dies. There are some minor ticks and light lines that justify the assigned grade but they can be overlooked in light of the overall sensational quality and visual allure. A rich orange-gold patina with apricot-rose hues attests to the originality and really adds to the stunning eye appeal.

PCGS 2, NGC 1. The other PCGS MS62 last sold back in August 2011; this was the NGC MS62 sold as part of the Twelve Oaks Collection back in 2016 which realized a world record price of \$25,850. That was a weak market, today, the PCGS Price Guide suggests a value of \$35,000. Two coins are listed finer on the PCGS Population Report, a 62+ and a 63 which neither has ever sold in auction. This is likely the FINEST you will see on the open market and will see very strong bidding, no doubt setting a new world record price when the hammer falls. Bound for a WORLD CLASS set of quarter eagles. Good luck.

PCGS# 7795 | EST: \$25,000+

LOT 265

\$2.50 1864 PCGS AU50

An incredibly RARE and IMPORTANT Civil War era Philadelphia mint quarter eagle. The economic and political stresses brought on by the Civil War led to a suspension of specie payments in late 1861, which caused widespread hoarding of gold coins; mintages dropped dramatically. After producing zero circulation strike quarter eagles in 1863, the mintage increased to a miniscule original mintage of 2,824, of which fewer than two dozen (18-22 estimated) are known. The majority of these are well circulated, and precious few that survive are finer. Over the years, many collectors opted for a Proof striking of this date in place of a circulated one: Eliasberg only had a Proof striking; Harry Bass had a coin described as "Net EF-40; sharpness of AU50 or finer, but with traces of tooling." The Norweb Collection had an "AU55." No AU50 has sold since February 2002! Indeed, the only circulation strike 1864 quarter eagles to have sold in this decade is an XF45 in the 2019 ANA Auction and the BigMo PCGS AU58 CAC we sold that earlier came from the 2017 ANA auction.

Traces of flash cling to the lightly circulated surfaces on both sides. The color is a rich orange-tinged gold with soft iridescent overtones. The definition is sharp and shows essentially full, crisp details on both obverse and reverse showing little wear on the highest points. A strong glass shows some minor ticks and traces of contact, which might account for the AU50 grade assigned by PCGS. Housed in an older generation blue tag holder.

PCGS 3, NGC 0. Since the last AU50 sold two decades ago we have to look at the two most recent APRs from other grades. The XF45 mentioned above sold for \$50,400 in 2019 and the PCGS AU58 CAC in the BigMo collection sold for \$111,625. In AU50, the Collectors Universe value is listed at \$75,000 and we would not be shocked if this major Civil War date rarity sold for that, or more. Good luck.

PCGS# 7800 | EST: \$60,000+

LOT 266**\$2.50 1866 PCGS AU58**

The post-Civil War economy was recovering from five years of upheaval and the Philadelphia mint produced a mere 3,080 quarter eagles in 1866. Of those, only 60-75 are estimated to survive today in all grades. When David Akers wrote his seminal work on the U.S. Gold series, he noted that the average grade encountered in his survey of auctions was "VF-28" and said, "Most business strikes are very low grade, and the 1866 is tied for having the twelfth lowest average grade of any quarter eagle...I have not seen a strictly uncirculated 1866 and only one piece that even graded a full AU."

This is a very impressive borderline Mint State piece. The wear is limited to the slightest hint of friction on the surfaces. Generally well struck design elements show only light bluntness in the central obverse details. A rich orange-gold tone is accented by glowing underlying luster the flashes around the protected areas of the design. A strong glass reveals a dusting of ancient iridescence on the fields. A few old bag marks from its time in transport and very brief time in circulation during the onset of Reconstruction. The eye appeal is unaffected and is very pleasing for this rare and underrated date.

PCGS 5, NGC 8. The current PCGS Price Guide value is listed at \$12,500. VERY RARE in any Mint State grade! This is one of those dates that comes up so infrequently the market does not value it as it should be. A great opportunity is presented here for the advanced quarter eagle specialist! Who knows when the next one will pop up.

LOT 267**\$2.50 1866-S PCGS MS62**

Ex Eliasberg, as noted on the insert.

WOW! This is an incredible specimen of this scarce date. Tied for SECOND FINEST KNOWN, this virtually CHOICE Mint State piece has a pedigree that goes back to the early 1900s, and is from the greatest collection of all-time, Eliasberg! The western economy was gold based, and the mintage of quarter eagles in 1866 was about 10 times as large in San Francisco as it was in Philadelphia. That said, the gold

based economy called these right into circulation, and David Akers noted the average grade for the date was "VF-25." Akers also noted "Strictly uncirculated specimens are extremely rare." Today, the Population data from PCGS and NGC bear witness to this, and confirm that only 15 examples appear on the Reports, the finest, a single PCGS MS64.

Back when Bowers & Ruddy sold this coin as lot 203 of the United States Gold Coin Collection, October 1982, it was described as "one of the finest known examples of this issue." Now 40 years later, that is still true! A shimmering, satin luster glows in the fields highlighting wonderful golden colored surfaces. Well struck from heavily clashed dies, the surfaces are generally free of post minting distractions and the eye appeal is quite brilliant.

Ex David S. Wilson Collection, S.H. Chapman, March 1907, lot 225; J.M. Clapp Collection; John H. Clapp Collection; Clapp Estate to Louis E. Eliasberg, Sr., via Stack's private sale, en bloc; Bowers & Ruddy's October 1982 sale of the United States Gold Coin Collection (Eliasberg), lot 203; unknown intermediaries; Heritage, February 2002, lot 6873 (as NGC MS62).

PCGS 2, NGC 1. The current Collectors Universe value is listed at \$25,000. This coin is fresh to the market and worthy of any amazing set of quarter eagles. With just a single MS64 graded at PCGS, this coin belongs in a TOP TIER set. Good luck.

LOT 268**\$2.50 1870-S PCGS MS63**

A very scarce date in all grades, originating from a small mintage of 16,000, of which about 130 examples are thought to be known in all grades, per PCGS CoinFacts. David Akers explained that these are VERY RARE in full Mint State and the average grade is in the VF range.

The 1870-S quarter eagle is apt to be bluntly struck, so the sharply struck example offered here, which ranks as tied for SECOND FINEST CERTIFIED, is a very fine exception for how these usually come. Virtually all details were crisply rendered from an exacting blow from the dies. Flashy and brilliant lustrous surfaces have tinges of reflection and satin frost. The rich golden color really adds to the outstanding visual allure of this Condition Census level, CHOICE Mint State example. A strong visual allure on this impressive conditionally rare date and one that belongs in a very special set of quarter eagles.

PCGS 4, NGC 1. This coin has not sold in auction in a decade. The current PCGS Price Guide value is \$20,000. There are just two examples graded higher, both MS64, one of which recently sold for \$34,800 in March 2020. This very attractive example is worthy of a high ranked set and will see very spirited bidding. Good luck.

**LOT 269****\$2.50 1876-S PCGS MS62**

A pleasing Mint State example of this lower mintage S-mint quarter eagle. Only 5,000 were struck and that is the lowest mintage for any San Francisco mint quarter eagle, save the 54-S. Truly Mint State pieces are VERY SCARCE and ultra rare any finer than the presently offered MS62.

Offering the typical strike, this near CHOICE piece has some central bluntness but overall the details are nicely defined. A warm, satiny mint luster highlights a rich yellow-gold patina. The surfaces show some light traces of contact, but they are not hacked up really. The eye appeal is pleasing for a date that often comes well worn.

PCGS 11, NGC 5. There has not been a non-CAC PCGS graded example sold in auction since August 2011. The current PCGS Price Guide value is listed at \$5,000 and keep in mind that an 1876-S quarter eagle in MS63 or finer will cost \$20,000+. Good luck.

We had the honor of selling this HIGH END GEM 1879 quarter eagle in Regency Auction 27, lot 439, as part of the Chester Roche Collection. There it was described as: "An AMAZING GEM with a rich glowing mint vibrance. Sharply struck with smooth, problem free surfaces. Pleasing yellow gold surfaces on both sides show some richer tone on the reverse. High end and original, this coin is housed in an OGH." Today, we have nothing to add, just to say that no CAC-approved MS65 has sold in the four years since its prior appearance!

PCGS 21, NGC 13, CAC 7. This GEM sold for \$4,818, well above current published levels. Prior to that, the last PCGS/CAC coin sold in September 2013. We can honestly say that only two appearances in nearly a decade speaks volumes for the rarity of QUALITY Gem specimens of this date. Only a dozen have graded finer. A great coin for any type or date set of quarter eagles, and one that will certainly delight any collector.

PCGS# 3938 | EST: \$4,000+

LOT 271**\$2.50 1880 PCGS MS64**

An ultra brilliant example with deeper orange highlights. Among the higher graded pieces at PCGS there are only 8 on the Population Report at MS64 with just seven finer. Only 2,960 were originally struck.

This coin is highly lustrous and offers a razor sharp strike. Very clean surfaces hold up under close inspection with a strong glass. The eye appeal is excellent in every way, a coin that is sure to delight even the pickiest of gold bugs!

PCGS 8, NGC 5. The most recent PCGS-graded example sold back in August 2018 and realized \$7,200, Just seven have ever graded higher, only a single example sold 11 years ago, a PCGS MS65 that brought \$14,375. Worthy of a great set of quarter eagles. Bid accordingly.

PCGS# 7832 | EST: \$7,500+

LOT 272**\$2.50 1892 PCGS MS65 CAC**

A high end and very flashy lustrous GEM example that survives from a paltry mintage of 2,440. Multiple bands of cartwheel luster rolls smoothly and boldly across the smooth nearly pristine surfaces. Only intense scrutiny with a strong glass reveals a tiny tick or line with effort. The devices show razor sharp, crisply defined surfaces that stand out boldly against the surrounding fields. The eye appeal is further enhanced by a wonderfully rich lemon-yellow and orange-gold patina. Housed in an older generation blue tag holder.

PCGS 7, NGC 6, CAC 2. This coin has not sold since December 2008. The other CAC-approved MS65 sold in the 2016 ANA auction for \$9,400 (an overall weaker market). The current PCGS Price Guide value is listed at \$10,000 and the CAC CPG value is listed at \$10,600. PCGS has graded 10 coins higher, the most recent of these to sell was a PCGS MS67 CAC that sold in our October 2017 auction for nearly \$23,000. Bid accordingly.

PCGS# 7844 | EST: \$8,000+

LOT 273

\$2.50 1895 PCGS MS65 CAC

A radiant and brilliantly lustrous PQ GEM example of another lower mintage quarter eagle. Only 6,000 quarter eagles were struck for circulation, and as expected are quite difficult to find in high grade. The present example is sharply rendered with crisply defined details. The frosty, satin-like sheen is bold and vivid, accenting the essentially mark-free surfaces, devices, and wonderful coloration. The eye appeal is great!

Ex Davis Collection, Heritage, September 2003, lot 7729; Flagg Family Collection, Heritage, January 2013, lot 6941.

PCGS 16, NGC 16, CAC 6. The last PCGS/CAC example to sell in auction was back in November 2013! An APR from nearly a decade ago is irrelevant. The current CAC CPG value is listed at \$5,250 and the Collectors Universe value is \$6,500. Anything finer will cost around five figures. Good luck.

PCGS# 7847 | EST: \$5,000+

LOT 275

\$2.50 1926 PCGS MS65+ CAC

This is truly a beautiful example of Bela Lyon Pratt's incuse Indian Head quarter design. Intensely lustrous surfaces ripple with bands of incredible brilliance, accenting the rich golden surfaces that are kissed with iridescent hints of pale, powder blue and deeper orange hues. The eye appeal is sensational, every bit worthy of its lofty grade and CAC approval.

PCGS 933, NGC 644, CAC 96. There are 69 in MS65+, no doubt including some duplication of submissions in hopes of an even loftier grade. The current PCGS Price Guide value is listed at \$4,500 and this coin has records from a decade and a half ago for over \$4,000 so ignore the other PCGS MS65+ CAC APRs, this coin will sell for a strong bid.

PCGS# 7950 | EST: \$3,500+

LOT 274

\$2.50 1926 NGC MS65

A visually appealing GEM with warm satiny luster that accents a lovely honey gold patina. The strike is well executed with razor sharp definition to the incuse design elements and the surfaces are generally clean and free of serious traces of contact that would impair the eye appeal.

PCGS 864, NGC 621. The most recent NGC MS65 sold in November 2021 for \$1,920 and the current Collectors Universe value is listed at \$2,750. Conditionally challenging finer, NGC has graded a mere 22 in MS65+ and 32 in MS66 finer. A lovely example for type or date purposes.

PCGS# 7950 | EST: \$1,600+

LOT 276

\$3 1854-O PCGS XF45 CAC

This is a very attractive, collector grade example of this sole New Orleans mintage from the \$3 gold series. Only 24,000 were struck, and is highly desirable in an original, unmolested, unconserved state of preservation. Soft olive-tan overtones impart a great look on both sides. While we note some marks from use in commerce, these are generally unobtrusive and do not impair the excellent originality of the surfaces, or have an impact on the wonderful eye appeal.

PCGS 196, NGC 164, CAC 23. The current PCGS Price Guide value is listed at \$3,250 and the CAC CPG value is listed at \$4,060. This was the most recent example to sell, bringing \$3,360 two years ago. A popular issue worthy of a nice collection of \$3 gold pieces or New Orleans type.

PCGS# 7971 | EST: \$3,000+

LOT 277

\$3 1878 PCGS MS65+ CAC

What a GORGEOUS and extremely HIGH END GEM example of this wonderful \$3 gold piece. While the 1878 \$3 is considered a type coin, relatively common in all grades, it is indeed quite scarce in this lofty a state of preservation.

Exceptionally clean and smooth surfaces are a major highlight. Tons of luster blazes off this coin from everywhere possible. The luster enhances the totally stunning original vibrant yellow and bold orange gold colors. The luster makes the colors "ripple" as you rotate the surfaces in a light. There are NO spots or discolorations. Miss Liberty and the details are frosty and have crisp full strikes. The eye appeal is great!

PCGS 237, NGC 142, CAC 49. There are 18 in MS65+ at PCGS. The most recent PCGS MS65+ CAC to sell in auction realized \$16,450 in our recent sale of the Oak Collection. Marginally finer MS66 examples sell for \$20-\$25,000. This beauty is worthy of a very strong bid and we would not be surprised if the Collectors Universe value of \$17,500 is surpassed when the gavel falls. What a great example for any type or date set.

PCGS# 8000 | EST: \$12,500+

LOT 278

\$3 1887 NGC PR64+ UCAM CAC

An amazing VERY HIGH END, essentially GEM caliber Proof \$3 gold piece. The ultra cameo contrast is bold on both sides, so if the quality does not blow you away, the monster eye appeal will!

Remarkably deep mirrors beam intensely all over. They have strong clarity, cleanliness, and are highly reflective. When you twirl the coins, the mirrors look like brilliant highly polished mirrors of gold (which they are). The contrast is bold and gorgeous. Miss Liberty and every detail are needle sharp in strike, stand out boldly, and have world class thick gold frost. There are NO discolorations or spots anywhere and all there is keeping it from a higher grade is a tiny tick on the field. The eye appeal is truly breath taking!

Only 160 Proofs were struck. PCGS 5, NGC 1, CAC 4. There are no recent comps for a PR64 DCAM or UCAM selling, but a PCGS PR65 DCAM CAC sold in April 2022 for \$48,000. In PR64+ DCAM the Collectors Universe value is listed at \$36,000. The PR64 DCAM CAC CPG value is \$38,400 and in PR65 DCAM is listed at \$57,600. NGC has graded just a half dozen examples finer in the UCAM designation.

PCGS# 98051 | EST: \$27,000+

LOT 279**\$5 1846-O PCGS AU55 CAC**

This is a very CHOICE example of this scarce New Orleans date half eagle in a wonderful state of preservation and boasting an exceptional eye appeal. The vast majority of the 58,000 1846-O \$5s went right into circulation, and those that survived are apt to be in the VF or XF grade ranges; examples in AU55 are downright RARE, and this date is VERY RARE any finer, with none grading finer than MS62 at PCGS.

The present example boasts a bold and flashy semi-Prooflike reflective luster in the fields on both sides. There are some very minor traces of contact on essentially unworn surfaces. The wear, is limited to the slightest friction on the highest points and in the fields. The warm tangerine-honey gold patina adds to the outstanding visual allure. The details show crisp definition on both sides throughout, and are nice and frosted, giving this coin a beautiful look.

Ex Stack's, June 1979, lot 90; Stack's Bowers, April 2022, lot 6250.

PCGS 13, NGC 18, CAC 5. Two PCGS AU55 examples sold in the April 2022 Stack's Bowers Auction, the other coin was from the Fairmont-Hendricks Collection, realizing \$9,300 and this one realizing \$10,200 (clearly this was the better of the two pieces), and finer than the one that sold in March 2014. The current Collectors Universe value is listed at \$10,000. Just a dozen and a half examples are graded finer at PCGS and only five are finer at CAC.

PCGS# 8230 | EST: \$9,000+

LOT 280**\$5 1852-D NGC AU58 CAC**

A very eye appealing 1852-D half eagle! Offering a bold eye appeal, this date, while available in lower grades with some frequency, in AU58 and higher grades, this date is quite rare. Indeed, the mintage was sizeable with over 91,000 struck, but these circulated widely in pre-Civil War southern commercial channels and the average survivor is apt to be in the VF-AU50 range. Showing just the lightest hint of friction on the high points and in the fields, the surfaces are generally devoid of anything more than the slightest tiny traces of contact in the obverse fields. The strike is above average with decent definition

to Liberty's hair curls and eagle's feathers, but the typical peripheral weakness is seen at the obverse rims. Rich honey-wheat gold color with lovely original olive accents adds to the lovely eye appeal, the present AU58 is very high end for the grade.

PCGS 18, NGC 40, CAC 10. The current Collectors Universe value is listed at \$10,000 and the most recent AU58 to sell was a non-CAC PCGS-graded coin that brought \$8,700 in May 2022. RARE in Mint State, this is a highly collectible piece of southern gold that will delight any collector. We expect strong bidding.

PCGS# 8252 | EST: \$6,500+

LOT 281**\$5 1854-C WEAK C PCGS XF45 CAC**

Ex Fairmont Collection, as noted on the insert. The 1854-C is a rare issue in any grade, especially with CAC approval. Two different varieties were struck, one with a bold mintmark, and as here a weak C. The mintmark on this CHOICE XF piece is visible to the unaided eye, despite being weakly impressed into the die. The surfaces are generally very pleasing, especially for an issue that often comes impaired.

PCGS 10, NGC 11, CAC 2. This one sold in August 2021 for \$5,760 well in excess of current published levels. Indeed the eye appeal is better on this XF45 than the PCGS/CAC AU50 sold in April 2022. Bid accordingly.

PCGS# 98257 | EST: \$3,500+

LOT 282

\$5 1855 PCGS MS64+

Tied for FIENST graded. CAC was too tough by not beaming it as it has many nice qualities.

Exceptional surfaces are clean and smooth. Only when using a strong glass can you detect some light frost breaks only. A strong luster beams well from all over. Both sides are enlivened by a mix of gold/pale orange gold/greenish gold colors. There are NO spots or discolorations. Miss Liberty and the details are well struck and have delicate frost. The eye appeal is superb!

PCGS 2, NGC 7. PCGS has graded 3 coins in MS64+ and NONE higher. The current Collectors Universe value is \$30,000. We could see this beauty selling for more than that! A great put away coin.

LOT 283

\$5 1908 LIBERTY NGC MS65+

A wonderful GEM example of this final Liberty head date. Struck with only slight modifications since 1839, the 1908 is the end of an era. Vivid golden luster blooms boldly on both sides. Sharply struck and delicately toned with an iridescent pale blue at the peripheries imparting a wonderful look. Just a couple of very minor ticks keep this from an even loftier grade.

PCGS 32, NGC 11. The most recent example sold in a May 2022 online only auction, realizing \$2,075. A popular date.

PCGS# 8418 | EST: \$1,800+

LOT 284

\$5 1909-D NGC MS63 CAC

Choice and original, this is a pleasing example for a type or date collector. Well struck and lustrous with a rich, deep orange gold tone, this \$5 Indian has a great look for the grade. There is some minor contact but the eye appeal does not negatively impact the CHOICE eye appeal.

PCGS 11611, NGC 8653, CAC 1180. CAC examples have been selling in the \$1,300 range, while the Collectors Universe and CAC CPG value are \$1,750 and \$1,740 respectively. A pleasing example for type purposes we expect bidding to be strong when it crosses the block.

PCGS# 8514 | EST: \$1,250+

LOT 285

\$10 1868 PCGS AU58 CAC

This is a VERY RARE and important offering! One of only 10,630 that were originally struck, and of that number PCGS CoinFacts estimates that 175 survive in all grades.

Precious few are seen in Mint State, as the vast majority of this low mintage date went right into the Reconstruction economy and stayed in commercial channels for a long time. Back when David Akers wrote his seminal works on U.S. Gold coins, he was unaware of any

Mint State coins; when David Hall was building his set, only a single Mint State coin had been graded by PCGS. Today, PCGS has seen fewer than 10 in Mint State, none finer than MS62. The color is classic orange-gold with a hint of copper, substantial fully Prooflike luster remains and the surfaces are free of the deep and detracting cuts that so often are found on these rare early \$10 Liberties, particularly on Liberties face. Boldly struck too, with full knobby claws on the eagle and each of Liberty's curls displaying their fully rounded character at the highest points, mercifully preserved at this lofty grade level. PCGS 12, NGC 26, CAC 5.

The current PCGS Price Guide value is listed at \$10,000 and the CAC CPG value is listed at \$10,200. The only CAC Mint State coin, a PCGS MS60 CAC sold in April 2022 for \$18,000. A great coin for any advanced set.

Precious few are seen in Mint State, as the vast majority of this low mintage date went right into the Reconstruction economy and stayed in commercial channels for a long time. The definition of an MS60. There is no wear anywhere on this lovely and lustrous Brilliant Uncirculated example.

Well struck with a bold semi-Prooflike flashy luster this is a very attractive and pleasing example of this date in a **RARE** state of preservation.

PCGS 5, NGC 5. The last NGC MS60 sold back in March 2016--six and a half years ago. More recently a PCGS MS60 CAC sold for \$18,000. The current Collectors Universe value is listed at \$20,000. NGC has graded just two finer. This attractive coin is worthy of a wonderful collection.

Ex D.L. Hansen Collection, as noted on the holder. After mintages plunged earlier, the mintage picked up to 53,140 pieces for the year, but not all that many survived in any Mint State grade. Well worthy of its CAC approval, the quality is all there and then some for the assigned grade! Here is a very pleasing, frosty lustrous coin that offers strong visual appeal and attractive surfaces defined by a totally original medium orange-gold tone. A few faint wispy lines from the choice grade., this coin is not at all hacked up or unattractive.

LOT 288**\$10 1891-CC PCGS MS63**

This **CHOICE** Mint State 91-CC is essentially a twin to the example we sold in our Central States Regency Auction in April.

This is a wonderful date for anyone looking for a CC \$10 for a gold type set. The sizeable six-figure mintage made this date relatively available in AU and lower Mint State grades, but **RARE** any finer than the presently offered MS63. Boldly lustrous surfaces are have a strong mint brilliance on both sides with generous traces of semi-reflective flash. While we note some scattered contact and bag marks, but the surfaces are not at all hacked up. Old coppery toning gives this example a wonderful, original look.

PCGS 111, NGC 87. The most recent example to sell was the above mentioned example, which realized \$9,106. The current Collectors Universe value is listed at \$15,000. Always popular, Carson City double eagles are their own specialty, just like Carson City dollars. There is something extremely romantic about Carson City double eagles; big gold coins that have the aura of the wild west and the myths of bandits, bank robberies, stage coach chases, and the like. This AU53 retains a wealth of brilliant luster that highlights the lovely toned gold coloration. There are some friction lines and some minor traces of contact from its brief stay in circulation, none of which have an impact on the pleasing eye appeal.

PCGS 94, NGC 116. The last examples sold before the strengthening of the current gold market. The current PCGS Price Guide value is listed at \$7,750 and none have sold in two years. This popular date will delight any gold collector.

\$20 1891-S PCGS MS63

A boldly and brilliantly lustrous example! There is no doubt in our minds this 1891-S came from some old time overseas holding, as it has the classic "Euro" look. This coin has warm, original rich orange-gold patina on the surfaces. There are a few scuffs which account for the assigned grade, but have little impact on the outstanding visual allure of this CHOICE, PCGS-graded example.

PCGS 1129, NGC 597. The current Collectors Universe value is listed at \$4,500 and the most recent example sold for \$4,266. Scarce finer, this pleasing MS63 belongs in a carefully selected set of double eagles or gold type coins. Good luck.

Ex Fairmont Collection, as noted on the insert.

Despite a fairly generous mintage in excess of 1 million, the 1894-S is a formidable condition rarity with about two dozen specimens graded in GEM between PCGS and NGC combined. This near-GEM is boldly lustrous with a vivid cartwheel bloom and deep orange-gold coloration that adds to the outstanding eye appeal. Just a trace of contact is all that keeps this brilliant and pedigreed example from a GEM holder.

NOTES

THE Ed Wielawski Oregon COLLECTION

Legend Rare Coin Auctions is pleased to present the Ed Wielawski Collection of Oregon Half Dollars. This is the current #4 specialized collection of Oregon halves on the PCGS Set Registry. This popular classic commemorative type was struck for multiple, non-consecutive years, beginning in 1926 and ending in 1939. The complete series consists of 14 coins. Designed by James Earle and Laura Gardin Fraser, the obverse depicts a standing Native American in full headdress in the foreground, the map of the continental United States with a stylized covered wagon that follows the path of the famed Oregon Trail. The reverse shows a family traveling by covered wagon, the father leading the oxen on foot, while mother holds baby at the front of the wagon, as they follow the sun west. It is one of the most beautifully designed and adored type among the fifty that make up the classic commemorative type set. Ed Wielawski, a retired Postal employee and now full time coin dealer spent the last few years traveling the coin show circuit buying and selling coins, as well as seeking out these wonderful specimens offered in Regency 54. All the coins were hand selected by Ed, and many are either tied for finest or second finest for the issue; some of the coins are old friends, having been offered in earlier Regency Auctions. There are important collecting opportunities here not to be missed. From Ed and LRCA, we wish you the best of luck in bidding.

Splashes of blue, gold, and orange toning blends with earthy iridescent toning. The surfaces are free of distracting marks. The strike is sharp and the eye appeal is bold. With just five coins ever grading higher, this gorgeous MS67+ is about as high a grade Huguenot half dollar anyone could ever hope to add to their SUPERB set.

PCGS 100, NGC 72, CAC 30. There are 24 graded MS67+ at PCGS and just a half dozen finer. The most recent example to sell was not CAC approved and realized \$5,640 in our May 2021 Regency Auction. The current PCGS Price Guide value is listed at \$7,250. The MS68 CAC example from our recent offering of the Unforgettable Collection realized \$47,000, a world record price. This beautiful and original SUPERB Huguenot is worthy of very strong bidding and will delight any advanced collector.

LOT 338**50C 1936-S OREGON PCGS MS68**

Tied for second FINEST PCGS graded 36-S Oregon half dollar. Only 5,006 were struck and of that mintage, just a single coin has graded finer. Gorgeous, pristine surfaces have a bold, satiny mint glow that accents the original, pearly silver that shows just the slightest touch of orange-gold at the rims. The devices are sharply struck up with full, complete definition on both sides. This notable type and subset in the commemorative series showcases the artistry of James and Laura Fraser.

This classic is a quintessential American design commemorating the westward expansion of the mid 19th Century.

PCGS 11, NGC 29, CAC 10. The most recent examples have sold in the \$5,160 to \$6,756 range. The current Collectors Universe value is listed at \$7,250 and the CAC CPG value is \$7,190. The sole finest MS68+ has yet to sell in auction, this is an amazing example worthy of any world class commemorative set.

PCGS# 9346 | EST: \$5,500+

LOT 339**50C 1935 SPANISH TRAIL PCGS MS66+ CAC**

This is a totally original PQ GEM Spanish Trail with distinct claims to an even loftier grade. Satiny lustrous surfaces swirl with a glowing underlying brilliance that highlights the delicate golden tone. With a mintage of 10,008, the Spanish Trail commemorative half dollar is one of the lowest mintage types in the 50-piece type set, and its "cow head" design (a play on the name of Alvar Nunez Cabeza De Vaca) is always popular.

PCGS 745, NGC 469, CAC 175. There are 44 graded MS66+ at PCGS, no doubt the Population and Census figures include duplication of submissions. The most recent PCGS/CAC MS66+ sold in a December 2019 Online Only Auction which realized \$1,625. The current PCGS Price Guide value is listed at \$1,650--this one is certainly going to exceed that level in today's market and will find itself in a fine set of Classic Commemorative type.

PCGS# 9376 | EST: \$1,500+

**LOT 340****1C 1858 J-206 PCGS PR65 CAC**

A spectacular GEM example of the "Skinny Eagle" pattern cent. Struck in copper nickel with a plain edge, this is a Rarity-5 issue with 30-76 struck. No question this coin is totally ORIGINAL and has NEVER been messed with. Typical for the date, the mirrors are moderate and have a satiny look. There are ZERO impairments anywhere. The color is a beautiful even reddish golden brown. Every detail is lightly frosted and has a needle sharp strike. The eye appeal is fabulous!

PCGS 8, NGC 3, CAC 6. Do NOT be fooled about its rarity. Prior to this one selling in our April 2022 sale of the Glorious Patterns Collection, the last PCGS CAC example to sell in auction brought \$9,000 in November 2021. There is a Collectors Universe value of \$9,000. NOTE: A regular 1C 1858 in PCGS/CAC PR65 would WHOLESAL for \$20,000+ today. No matter how picky you are, this coin WILL please you!

PCGS# 11877 | EST: \$7,000+

LOT 341**50C 1859 J-239 PCGS PR63 CAC**

A CHOICE example of James Longacre's "French" Liberty head half dollar pattern. Tall head of Liberty faces right with a crown of oak and ivy leaves, draped with a ribbon inscribed LIBERTY. Reverse: 1/2 DOLLAR within cereal wreath. Struck in silver with a reeded edge. This is a "common" pattern type, listed as a Rarity-4, with 76-200 estimated struck. Fresh to the market, this coin was just graded for the first time at the recent PCGS show. Flashy watery fields are dusted with a rich antique iridescent tone. The eye appeal is great for the PR63 grade.

PCGS 15, NGC 3. The last PCGS-graded PR63 sold back in March 2010, realizing \$2,990. The current Collectors Universe value is listed at \$2,700. Despite its common status, it is RARE finer. A great entry level pattern type for someone looking to dip a toe into the wide world of pattern issues. Good luck.

PCGS# 11972 | EST: \$2,200+

LOT 342

H10C 1870 J-818 PCGS PR65 BN CAC

A very challenging and popular Pattern half dime. Considered to be Rarity-7- (7-12 minted) this Judd number pairs Barber's Seated Liberty obverse with the regular Proof die. Struck in copper with a plain edge. The present GEM is bold, flashy and glitters boldly on both sides. A hint of original red frame the legends, melting into even soft brown with lilac overtones on the obverse and the reverse has a blast of neon-blue at the peripheries. The eye appeal is stunning!

PCGS 2, NGC 1, CAC 2. The other PCGS/CAC example is the Simpson coin, which is no where close to as attractive as this GEM and it sold for \$3,120 in the 2021 ANA auction. How is it that a coin this rare can trade for only a relatively small premium over what a regular issue Proof 1870 half dime would bring? These are such great values.

PCGS# 61062 | EST: \$2,800+

LOT 344

25C 1870 J-885 PCGS PR65 RB

A GEM example of this Rarity-7- pattern quarter. William Barber's Seated Liberty obverse paired with the regular issue proof reverse die. Struck in copper with a plain edge. Perhaps 7-12 known in all grades, and this one ranks near the top of the Pop for the RB category. This highly attractive J-885 is a near twin to the ex Denali coin we recently sold in our May 2022 offering of the Glorious Patterns Collection. Mostly red surfaces beam with a bold reflection. Splashes of iridescent blue tone graces the surfaces, thus the RB designation, but it does not obscure the depth or brilliance of the mirrors. Housed in an old green tag holder.

PCGS 3, NGC 0. The current Collectors Universe value is listed at \$5,500 and the Glorious Patterns coin is the most recent to sell bringing \$5,523. We expect this coin will likewise see strong bidding and find itself at home in a great cabinet of pattern issues.

PCGS# 71129 | EST: \$4,000+

LOT 343

10C 1870 J-837 NGC PR64 CAM

This is the ONLY example of this Rarity-5 Standard Silver dime pattern certified as a CAMEO at either PCGS or NGC. Standard Silver design with Liberty wearing a cap with three stars. Struck in silver with a reeded edge. A blazing GEM! Deep beaming mirrors are untuned and contrast boldly against the frosted devices. The eye appeal is mint fresh and very pleasing!

PCGS 0, NGC 1. The current Collectors Universe value in the non-CAM designation is \$2,300. We have sold only two non-CAM J-837s: the Steven Cook PCGS PR66 at \$2,056 in July 2018 and the Simpson PR67 CAC for \$3,995. We expect this CAM will bring a strong bid. Worthy of a nice cabinet of Patterns.

PCGS# 629249 | EST: \$1,800+

LOT 345

50C 1870 J-954 NGC PF66 BN CAM CAC

This is a VERY attractive example and one of the FINEST KNOWN of this RARE Standard Silver pattern half dollar. Featuring William Barber's bust of Liberty facing right with a plain diadem and headband with the word LIBERTY; Standard Silver reverse. Struck in copper with a plain edge, J-954 is a Rarity-7+ pattern with 4-6 examples estimated produced and survive in all grades and designations. Highly reflective, ultra flashy copper mirrors beam boldly all over in the fields contrasting against the rich, frosted texture of the crisply defined reliefs. An extraordinary and vivid pale blue and violet patina creates a sensational overlay over nearly flawless surfaces, giving this GEM an off the charts eye appeal.

PCGS 0, NGC 1, CAC 1. This remarkable GEM sold for \$5,280 in December 2020. Unpriced in the Collectors Universe Price Guide, it is much finer than the Bob Simpson PCGS PR64+. An important coin for the advanced collector of patterns, one that will fit nicely in any amazing cabinet!

PCGS# 861200 | EST: \$5,000+

LOT 346

50C 1870 J-989 PCGS PR67+ RB CAC

Ex Larry Shepherd Collection, as noted on the insert.

WOW, WOW, WOW! This is by far the FINEST J-989 that exists, and is one of the HIGHEST graded Standard Silver patterns regardless of Judd number! This coin is a BEAST! The J-989 shows Liberty with her hair tied in a bun, with lower flowing locks at the shoulder. A ribbon with LIBERTY and a single star at the front ties her hair back. Struck in copper with a reeded edge, this is a very challenging low Rarity-7 Standard Silver pattern half dollar.

As one would expect for a coin in such a lofty state of preservation the surfaces are immaculate! Flawless, ultra reflective mirrored fields are flashy and brilliant with bold depth of clarity. Incredible RED color shows light violet overtones on the reverse. The edges of the razor sharp devices show fancy pull away toning that leaves the outlines in gold. Aside from a tiny planchet flake and a microscopic fleck or two, this coin is FLAWLESS!

PCGS 1, NGC 0, CAC 1. Keep this in mind, the world famous Bob R. Simpson Collection contained the former Bass coin, graded a full 1 1/2 points lower and there was not much red left on that iridescent toned PR66 RB and was not CAC. This AMAZING coin realized \$14,688 in our October 2021 Regency Auction and the PCGS Price Guide value in PR67+ RB is \$15,000. If you are looking for one Standard Silver pattern, this coin should be it!

PCGS# 71235 | EST: \$12,000+

LOT 347

\$1 1871 J-1148 PCGS PR66+ RB CAC

One of the **FINEST KNOWN** Longacre Indian Princess dollars that exists, regardless of Judd number. It is one of the most beautiful obverse designs in the entire pantheon of Pattern issues. Liberty, wearing a feathered headdress is seated facing left, her hand supporting a globe, holding a pole with a Liberty cap and flags behind. Struck in high relief, the devices are almost medallion in nature. The reverse is the regular 1871 Proof reverse die. Struck in copper with a plain edge, this is a Rarity-7- Pattern dollar with about a dozen known in all grades. This is the **FINEST** graded, and it is more than worthy of that designation.

Remarkable mirrors are crystal clear, are perfectly clean, are deep, and have magical ultra strong reflectivity. The mirrors look like a freshly formed clear sheet of ice. Stunning **ORIGINAL** colors of pale Mint Red/gold/pale violet beam from both sides. There are **NO** spots, but there is a small unquestionable toning stain in the eagle on the reverse. Miss Liberty and every detail are frosted and have full crisp strikes. This coin is total delicious eye candy!

PCGS 3, NGC 1, CAC 2. This is the **ONLY** PR66+ RB graded and it realized \$25,850 in our January 2020 Regency Auction. Prior to that, this coin realized \$28,200 in our May 2018 Regency Auction (as PR66 RB , and subsequently submitted for "+"). The current PCGS Price Guide value is listed at \$35,000. Too bad this design never made it into coinage--it is beautiful! This will be a stunning fit in anyone's **SUPERB** Pattern collection.
